| Subject: **Differential Calculus & Matrix Algebra** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B.Tech All Branches** | | | | Subject Code: SH0101 | | | Semester: **I** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 4 | 2 | 0 | 5 | 60 | 00 | 40 | 00 | 100 |

**Course Objectives:**

1. To provide mathematical knowledge and skills needed to support their concurrent and subsequent engineering studies.
2. To provide an ability to apply knowledge of basic science and engineering fundamentals.
3. To provide an ability to undertake problem identification, formulation and solution.
4. To provide an ability to analyze different mathematical models within science and technology and work creatively, systematically and critically.
5. To provide an ability to find strategies for the solution of different types of mathematical models using knowledge about the possibilities and limitations of the different methods and tools.
6. To provide an ability to develop abstract, logical and critical thinking and the ability to reflect critically upon their work and work of others.
7. To provide an ability to insight their strengths and weakness as learners and to appreciate the value of errors or mistakes as powerful motivators to enhance learning and understanding.

**Contents**

**UNIT I** **Differential Calculus** **10 hrs.**

Derivatives of nth Derivative of some Elementary Functions
Leibnitz's Theorem
Taylor's Series and Maclaurin's Series Expansions
Indeterminate Forms.
Functions of Several Variables: Limit and Continuity

**UNIT II** **Partial Differentiation and its Applications**

**13 hrs.**

Partial Differentiation
Variable Treated as Constant, Total Derivative
Partial Differentiation of Composite Functions: Change of Variable-Differentiation of an Implicit Function -Euler's Theorem
Jacobian, Error and Approximations
Taylor's Theorem for Function of two Variables
Maxima and Minima of Functions of two Variables: with and without constraints
Lagrange's Method of Undetermined Multipliers.

**UNIT III** **Basic of Matrix algebra** **13 hrs.**

Concepts of Determinants and Matrices, Types of Matrices
Row Echelon and Reduced Row Echelon form
Inverse of a Matrix, Rank of a Matrix, Normal Form
System of Linear Homogeneous Equations
System of Non-Homogeneous Equations, Gaussian Elimination Method

**UNIT IV** **Vector Differential Calculus** **12hrs.**

Curvilinear coordinate system, Cartesian, Spherical and Cylindrical coordinate system
Vector Differentiation, Directional Derivative, Gradient of a Scalar Function and Conservative Field
Directional Derivative, Gradient of a Scalar Function and Conservative Field
Divergence and Curl, Related Properties of Gradient, Sums of Divergence and Curl

| Subject: **Engineering Physics** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B.Tech All Branches** | | | | Subject Code: SH0001 | | | Semester: **I/II** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 3 | 0 | 2 | 4 | 60 | 60 | 40 | 40 | 200 |

**Course Objectives:**

1. An ability to apply knowledge of basic physics, mathematical foundations and engineering theory in the modeling and design of real-world problems (**fundamental engineering analysis skills).**
2. An ability to design and conduct experiments, as well as to analyze and interpret data **(information retrieval skills).**
3. An ability to analyze a problem , identify and formulate using the concept of physics and to solve engineering problem**(engineering problem solving skills).**
4. Recognition of the need for, and an ability to engage in continuing professional development and life-long learning **(continuing education awareness).**
5. An ability to use current techniques, skills, and tools necessary for Physics and engineering practice **(practical engineering analysis skills).**

**Course Content:**

**UNIT-I** **[12]**

**Wave motion and Sound**

Propagation of waves, longitudinal and transverse waves, mechanical and non-mechanical waves Introduction to sound waves, Characteristics and Properties of Sound, Absorption co-efficient, Reverberation time, Sabine's formula (without derivation), Factors affecting architectural acoustics,

Introduction of Ultrasonic waves, Generation of ultrasonic waves, Detection of ultrasonic waves, Applications of Ultrasonic waves: NDT, SONAR & others.

**Optics**

Introduction to Reflection, Refraction and Total Internal Reflection;

Wavefront and Huygen's principle;Interference: Types of interferences, Thin film interference, Newton's rings and its applications

Diffraction of light waves: Types of Diffraction, Single-slit Fraunhoffer diffraction, Plane diffraction grating, Resolving power of grating, Rayleigh Criterion, Optical polarization (Introduction)

**UNIT-II** **[11]**

**Quantum Mechanics**

Black body radiation: Planck's law (without derivation), Wien's displacement law and Rayleigh – Jeans' law from Planck's theory; Compton effect (Theory and experimental verification), De-Broglie theorem, Uncertainty principle; Schrodinger's wave equation – Time independent and time dependent equations – Physical significance of wave function, Particle in one dimensional rigid box.

**Laser**

Energy levels in atoms, Absorption, Spontaneous Emission and Stimulated Emission of light, Relation between Einstein's Coefficients, Population Inversion, Metastable State, Pumping Mechanism, Optical Resonators, Fundamentals of LASER, Characteristics of Laser radiation

Types of Laser: Solid State Laser (Nd-YAG laser), Gas laser (He-Ne laser), Applications of Laser: Medical, Industrial, Holography (introduction).

**UNIT-III** **[12]**

**Electromagnetism & Dielectrics**

Coulomb's law for distribution of charges, Gauss's law and applications, Electric current and Equation of continuity, Electric field intensity, Electric flux, Electric dipole moment, Electric field due to dipole, Introduction to dielectrics, Polarizability, Types of polarization – electronic, ionic, orientational, Polarization of dielectrics, Gauss's law in presence of dielectric, Dielectric constant, Electric susceptibility and Permittivity, Internal (Local) field in dielectric, ClausiusMossotti equation (with derivation)

Magnetic field, Steady current, Biot-Savart law, Ampere's law and applications, Faradays law of Induction, Lenz's Law; Effect of magnetic field on current carrying conductor, Lorentz force

**Magnetism**

Basic important terms and units in Magnetism, Concept and origin of magnetic moment, magnetic susceptibility, Total angular momentum, Diamagnetism, Paramagnetism, Ferromangnetism, Ferrimagnetism, Antiferromagnetism, Domain theory of Ferromagnetism, Curie temperature and hysteresis loss

**UNIT-IV** **[10]**

**Superconductivity**

Superconductivity: Zero resistance, Critical temperature, Meissner effect, Critical field, General properties of superconductors**,** Type-I and Type-II superconductors, BCS theory of Superconductor, High temperature superconductors
Applications of Superconductors: SQUID, Maglev

**Nanophysics**

Nanoscale, Surface to volume ratio, Surface effects on nanomaterials, Quantum size effect, Electron confinement, Nanoparticles and Nanomaterials, Properties of Nanomaterials
Advantages & Disadvantages of Nanomaterials**,**
Synthesis of nanomaterials: Laser ablation, ball milling, chemical vapor deposition, sol gel, Carbon nanotubes: structure, synthesis, properties and applications, Applications of Nanomaterials.

**Text Books:**

1. Engineering Physics by Rajendran (Tata Mc Graw Hill)
2. Engineering Physics by D.K. Bhattacharya, Poonam Tandon (Oxford University Press)

**Reference Books:**

**MOOCs:**

https://www.edx.org/course/subject/physics

**List of Experiments:**

1 Photocell: To verify the inverse square law using photocell.

2 Ultrasonic Interferometer: To determine the wavelength and velocity of ultrasonic wave through ultrasonic interferometer.

3 Determination of Refractive index: To determine the refractive index of a given material (prism) using spectrometer.

4 Resolving power of grating: To determine resolving power of a diffraction grating.

5 Newton's Ring: To determine the wavelength of monochromatic light

6 Planck's Constant : To determine the Planck's Constant using LED

7 Determination of Wavelength of Laser: To determine the wavelength of LASER using diffraction grating.

8 Determination of wavelength of laser using single slit

9 Dielectric constant: To determine the dielectric constant of a dielectric substance.

10 Hysteresis loss: To determine the Hysteresis loss in a Ferromagnetic material.

11 To determine the magnetic field at the center of a coil and its variation with distance and radius of the coil.

12 To verify the Faraday's law of electromagnetic induction.

4. https://www.khanacademy.org/

| Subject: **Electrical Workshop** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B.Tech All Branches** | | | | Subject Code: EL0001 | | | Semester: **I/II** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 0 | 0 | 2 | 1 | 00 | 60 | 00 | 40 | 100 |

**Course Objectives:**

After completion of this course, expected outcomes from the students:

1. **Fundamental Engineering Analysis Skill**: Ability to apply knowledge of Electrical Engineering.
2. **Information Retrieval Skills:** Ability to design electrical circuits and conduct experiments with electrical engineering as well as to analyze and interpret data.
3. **Practical Engineering Analysis Skills:** Ability to acquire new knowledge to use modern engineering tools and equipments to analyze problems necessary for engineering practice. Knowledge of basic electrical and electronic device.

## LIST OF EXPERIMENTS

| Exp. No. | Title | Learning Outcome |
|---|---|---|
| 1 | Introduction to symbols and abbreviations used in electrical engineering. | • Basic knowledge of symbols and abbreviations that are used in electrical engineering |
| 2 | Introduction to IE rules. | • Understanding of safety rules<br>• Safety precautions to be taken in the laboratory |
| 3 | Identify different types of cables/wires, switches, fuses, MCB, ELCB, MCCB with their ratings and usage. | • To understand basic working principle of different protective devices<br>• To recognize the practical applications of these protective devices by their demonstration |

| | | |
|---|---|---|
| 4 | Performance of Electric shock phenomena, precautions, preventions, earthing. | • To identify the importance of earthing in electric network.<br>• To understand, how earthing works |
| 5 | Measuring instruments like Ammeter, Voltmeter, Wattmeter, Watt-hour Meter, and Megger with their description and usage. | • To get familiar with different measuring devices<br>• To understand the working principle on which these devices work |
| 6 | To measure earthing resistance using insulation tester (Megger). | • Basic knowledge of earthing resistance<br>• Working principle of insulation tester (megger) |
| 7 | Wiring of power distribution arrangement using single phase MCB distribution board with ELCB, Main switch and Energy meter. | • To identify different components used in wiring scheme<br>• Basic knowledge of designing a simple wiring scheme<br>• To identify the principle and working of energy meter |
| 8 | Wiring of light/fan circuit using Two way switches (Staircase wiring), Wiring of fluorescent lamps and light sockets (6 A) | • Basic knowledge of staircase wiring<br>• Wiring of fluorescent lamps<br>• Identification of sockets |
| 9 | Wiring of backup power supply including inverter, battery and load for domestic installations. | • To have the basic idea of inverter and battery<br>• Basic knowledge of back-up power supply |
| 10 | Demonstration and measurement of power consumption of Electric Iron, Mixer Grinder, Single phase pump, exhaust fan or other home appliance. | • To have the knowledge of working of electric iron, mixer grinder and pump<br>• To demonstrate the power consumption by these devices |
| 11 | Preparing the drawing for wiring a newly built room, without any electrical wiring along with a bill of materials with specifications; the room may be a class-room, an office, a shop, a clinic, a small workshop etc. | • Exercise for students to make a wiring scheme for any of the given example<br>• To estimate the total cost of appliances, materials and wiring |

| Subject: **Elements of Electrical Engineering** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B.Tech All Branches** | | | | Subject Code: EL0002 | | | Semester: **I/II** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 3 | 0 | 2 | 4 | 24/60 | 24/60 | 16/40 | 16/40 | 200 |

**Course Outcome:**

1. **Fundamental Engineering Analysis Skill**: Ability to apply knowledge of Electrical Engineering.
2. **Information Retrieval Skills:** Ability to design electrical circuits and conduct experiments with electrical engineering as well as to analyze and interpret data.
3. **Engineering Problem Solving Skills:** Ability to identify, formulate and solve engineering problems.
4. **Practical Engineering Analysis Skills:** Ability to acquire new knowledge to use modern engineering tools and equipment's to analyze problems necessary for engineering practice.

**Contents:**

**UNIT-I** **[07]**

**DC Circuits**

**Elementary Concepts:**

Ohm's Law and Kirchhoff's Laws, Analysis of series, parallel and series-parallel circuits; Star–Delta conversion; Nodal analysis, Mesh analysis, voltage sources and current sources, Super position theorem, Thevenin's theorem, Norton's theorem, Equvalence of thevenin's and norton's theorem, Maximum power transfer theorem.

**UNIT-II** **[12]**

**Electrostatics:**

Electric charge and Laws of electrostatic, Capacitor; Capacitor in series and parallel, variable capacitor, Instantaneous voltage and current in capacitor, charging and discharging of capacitor, Energy stored in a capacitor, types of capacitor.

**Magnetic Circuit:**

Magneto motive force, magnetic field strength, reluctance, Relation between magnetic circuit parameter, Laws of magnetic circuit, composite magnetic circuit: series magnetic circuit, parallel magnetic circuit, comparison of Electric and magnetic circuit, Effect of magnetic field on current carrying conductor; Statically and dynamically induced EMF; Concepts of self inductance, mutual inductance, energy stored in inductor, coefficient of coupling; Inductance in series and parallel; Hysteresis and Eddy current losses.

**UNIT-III** **[16]**

**Single Phase A.C. Circuits:**

Generation of sinusoidal voltage, Definition of average value, root mean square value, form factor and peak factor; Phasor representation of alternating quantities; Analysis with phasor diagrams of R, L, C, R-L, R-C and R-L-C circuits; Concepts of Real power, Reactive power, Apparent power and Power factor, methods to improve power factor, Series, Parallel and Series - Parallel circuits; Power in AC circuit, Resonance in series and parallel circuits.

**Three Phase A.C. Circuits:**

Necessity and Advantages of three phase systems, Generation of three phase power, definition of Phase sequence, balanced supply and balanced load; Relationship between line and phase values of balanced star and delta connections; Power in balanced three phase circuits, measurement of power by two wattmeter method; Work, Power, Energy, Problems

**UNIT-IV** **[13]**

**Transformers:** Principle of operation and construction of single phase transformers (core and shell types). EMF equation, losses, efficiency.

**DC Machines:** Working principle of DC machine as a generator and a motor; DC series motor, DC shunt motor, DC compound motor constructional features.

**Induction Motor:** Concept of rotating magnetic field; Principle of operation, types and constructional features, slip and its significance.

**Text Books:**

1. A. Chakrabarti, "Basic Electrical Engineering", Tata McGraw Hill
2. A.E Fitzgerald, David E. Higginbotham, Arvin Grabel, "Basic Electrical Engineering", 5th Edition, Tata McGraw Hill.

| Subject: **Engineering Graphics** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B.Tech All Branches** | | | | Subject Code: ME0001 | | | Semester: **I/II** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 1 | 6 | 0 | 4 | 24/60 | 00 | 16/40 | 00 | 100 |

**Content:**

**Unit - I**

1. **Introduction to engineering graphics**
   Principles of Engineering Graphics and their Significance – Drawing Instruments and their Use – Conventions in Drawing – Lettering – BIS Conventions- Dimensioning systems – polygons-types of lines
2. **Engineering curves**
   Classification and application of Engineering Curves, Construction of different methods of Ellipse, parabola and Hyperbola, construction of Conics, Cycloid Curves – Cycloid, Hypocycloid, Epicycloids, Involutes and Spirals.

**Unit- II**

3. **Projections of Points and Lines**
   Introduction to principal planes of projections, Projections of the points located in same quadrant and different quadrants, Projections of line with its inclination to one reference plane and with two reference planes. True length and inclination with the reference planes.
4. **Projections of Planes**
   Projections of planes (polygons, circle, and ellipse) with its inclination to one reference plane and with two reference planes, Concept of auxiliary plane method for projections of the plane.

**Unit- III**

5. **Projections of Solids**
   Classification of solids. Projections of solids (Cylinder, Cone, Pyramid, Prism) along with frustum of cone and pyramid with their inclinations to one reference plane and with two reference planes.

**Unit- IV**

6. **Orthographic And Sectional Orthographic Projections**
   Fundamental of projection along with classification, Projections from the pictorial view of the object on the principal planes for view from front, top and sides using first angle projection method and third angle projection method, introduction of section of objects, full sectional view.
7. **Isometric Projections**
   Isometric Scale, Conversion of orthographic views into isometric projection, isometric view or drawing.

**Text Books**

1. P.J. Shah, "A Text Book of Engineering Graphics" Publication: S.Chand.
2. A Text Book of Machine Drawing By P. J. Shah S.Chand & Company Ltd., New Delhi

2. P.D.Patel, " Engineering Graphics" Publication: Mahajan
3. A text book of Engineering Drawing by R.K.Dhawan, S.Chand &Company Ltd., New Delhi
4. A text book of Engineering Drawing by P.S.Gill, S.K.Kataria & sons, Delhi

**Web Resources**

1. www.nptel.ac.in

| Subject: **Basic Electronics** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B.Tech All Branches** | | | | Subject Code: EC0001 | | | Semester: **I/II** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 2 | 0 | 2 | 3 | 24/60 | 24/60 | 16/40 | 16/40 | 200 |

**Course Outcome:**

After completion of the course, the student will be able to –

1. Recognize basic electronic components and devices used for different electronic functions
2. Explain the concepts of semiconductor physics
3. Design and test basic electronic circuits using active components
4. Solve basic problems in simple electronic circuits

**Contents**

**UNIT 1** **[10]**

**Energy Bands in Solids**

Charged Particles, Field Intensity, Potential Energy, The eV Unit of Energy, Nature of Atom, Atomic Energy Levels, Electronic Structure of the Elements, Energy distribution of electrons, Fermi-Dirac function, Energy Band Theory of Crystals, Insulators, Semiconductors and Metals

**Transport Phenomena in Semiconductors**

Mobility and Conductivity, Electrons and Holes in an Intrinsic Semiconductor, Donor and Acc in a Semiconductor, Electrical properties of Ge and Si, Hall Effect, Conductivity Modulatio of Charges, Diffusion, The Continuity Equation, Injected Minority–Carrier Charge, Pot Semiconductor,

**UNIT 2** **[10]**

**Junction –Diode Characteristics:** Open circuit p-n Junction, p-n Junction as a Rectifier, Current Components in a p-n diode, Volt-Ampere Characteristic, Temperature Dependence of the V/I Characteristic, Diode Resistance, Space Charge, Transition Capacitance, Charge-Control Description of a Diode, Diffusion Capacitance, Junction Diode Switching Times, Breakdown Diodes, Tunnel Diode, Semiconductor Photodiode, Photovoltaic Effect, Light – Emitting Diodes, Schottky diode, varactor diode, GUNN diode, SCR

**Diode Circuits:**
Diode as a Circuit Element, Load-Line Concept, Piecewise Linear Diode Model, Clipping Circuits, Clipping at Two Independent Levels, Comparators, Sampling Gate, Rectifiers, Other Full-Wave Circuits, Capacitor Filters, Additional Diode Circuits

**UNIT 3** **[5]**

**Transistor Characteristics:**
Junction Transistor, Transistor Current Components, Transistor as an Amplifier, CB Configuration, CE Configuration, CC Configuration, Analytical Expressions for Transistor Characteristics Maximum Voltage Rating, Phototransistor, Transistor biasing.

**UNIT4** **[7]**

**Field Effect Transistors:**
Junction FET, JFET Volt-Ampere Characteristics, MOSFET

**Operational Amplifiers:**
Introduction to Op Amps, Inverting Amplifier, Non-inverting amplifier, Op Amp applications

**Introduction to Data converters:**
ADC & DAC

**Introduction to Microprocessors and Microcontrollers:**
Basic digital ICs, Architecture of processors and controllers

**Text book**

1. 'Integrated Electronics' By J. Millman and C. C. Halkias, Chetan Parikh, 2nd Ed., Tata McGraw Hill Publication

**Reference Books**

1. ‘Electronic Principles’ by Albert Malvino and David Bates, 7th Ed., Tata McGraw Hill Publication
2. ‘Electronic Devices and Circuit Theory’ by Robert Boylestad and Louis Nashelsky, 9th Ed., Prentice Hall India
3. “Digital Electronics” by Morris Mano, 2006

**List of Experiments**

1. To plot VI characteristics of PN junction diode
2. To plot VI characteristics of Zener diode
3. To plot VI characteristics of Tunnel diode
4. To measure ripple factor of a rectifier
5. Build and test wave shaping circuits
6. To plot input and output VI characteristics of CB configuration using BJT
7. To plot input and output VI characteristics of CE configuration using BJT
8. To plot input and output VI characteristics of CC configuration using BJT
9. To plot drain and transfer characteristics of a JFET
10. To build and test inverting and non-inverting amplifier
11. To build an LED driver circuit and test
12. To build and test an integrator and differentiator with Op Amp

| Subject: **Materials Science** | | | | | | | | |

## 1. Course Outcomes

- Evaluate different materials for engineering applications.
- To categorize material according to their properties and requirement.
- To classify materials and understand the importance of each material in order to find applications in other fields of engineering.

## 2. Contents

| | | **Time Allotted** |
|---|---|---|
| **Unit 1** | Introduction, Engineering requirement of different materials, Classification of Engineering materials, Properties of engineering materials , Criteria for selection of materials for engineering application.<br>Crystal Physics; Structure of crystalline solids; Lattices, unit cells; Indexing of directions and planes, notations, Interplanar spacings and angles, Crystal structure analysis - Bragg's law for X-ray diffraction. | 8 hours |
| | | |
| **Unit 2** | Ferrous metals & Alloys- Pig iron, cast iron, carbon steel, alloy steels- Classification, properties, composition and applications.<br>Non-Ferrous Metals & Alloys- Important non-ferrous metals (Al, Cu, Pb, Zn, Sn, Mg, Ti, Ni,), Non-ferrous alloys (Cu alloys, Al alloys, Mg-alloys, Ni-alloys) – Composition, properties, classification and applications. | 12 hours |
| | | |
| **Unit 3** | Introduction, Simple crystal structure, Classification- Traditional (clay-products, refractories, abrasives, cement) and Engineering Ceramics- Glass Ceramics, Properties of ceramics, Application of | 12 hours |

| | | |
|---|---|---|
| | Ceramics, Glasses, Glass structure, Properties and application of Glass, Types of glass.<br>Introduction, Classification and forms of Polymers, Thermosetting & thermoplastic polymer, types of polymerizations, Molecular weight, Plastics, Natural rubber and synthetic rubber, Applications of polymeric materials. | |
| | | |
| **Unit 4** | Introduction, Classification & Applications, Dispersion-strengthened, Composites, Particulate Composites, Fiber-reinforced Composites: Influence of Fiber Length, Influence of Fiber Orientation and Concentration, The Fiber Phase, The Matrix Phase, Polymer-Matrix. Composites, Metal-Matrix Composites, Ceramic - Matrix Composites, Carbon–Carbon Composites, Processing of Fiber-Reinforced Composites.<br>Smart materials (Shape memory material, Piezo electric material) Photoconductors, Bio-materials, Nano materials, Dielectric materials, magnetic materials, metamaterials, Cryogenics, Optical Fiber. | 14 hours |

**3. Text Book(s)**

1) Material Science and Metallurgy by O.P Khanna, Dalpat Rai Publications
2) Engineering Materials by R. K Rajput, S. Chand Publications.
3) Material Science & Engineering – An Introduction by W.D. Callister, John Wiley.

**4. Reference Books**

1) Introduction to Materials Science for Engineers – James Shackelford, Pearson, Prentice Hall; 8 edition.
2) Elements of Materials Science –by L.H. Vanvlack, Addision-Wisley Series
3) Element s of Metal lurgy by D. Swarup, Rastogi Publication
4) Engineering Materials by S.C. Rangwala and P.S. Rangwala, Charotar publication house Pvt. Ltd.
5) Materials Science and Engineering by Willing F. Smith, TMH publication

**5. Web Resources**

| 1 | 2 | 0 | 2 | 60 | 00 | 40 | 00 | 100 |

**Course Objectives:**

1. To help students develop comprehension and soft skills
2. To increase student's ability to improve and utilize the technical skills necessary for reading and writing.
3. To improve students' communication skills in both technical and professional contexts.

**Course Content:**

**Unit 1:**
**Language Focus Vocabulary**
Technical vocabulary, Synonyms and Antonyms, Idiom & Proverbs, One Word Substitutes, Phrasal Verbs, Collocations.

**Unit 2:**
**Language Focus Grammar (Rules & Exception)**
Sub-Verb-Agreement, Tenses, Numerical adjectives, Conjunction and Preposition clauses, Noun and adjective clauses, Relative clauses, Imperative and infinitive structures, Question pattern, Auxiliary verbs (Yes or No questions), Contrasted time structures, Adverbial clauses of time, place and manner, Intensifiers, Basic pattern of sentences(Simple, Complex, Compound Construction).

**Unit 3:**
**Listening**
Listening to lectures, seminars, workshops, TED Talks, Writing a brief summary or answering questions on the material listened.

**Unit 4:**
**Speaking**
Phonetics (Pronunciation, stress and intonation), Role Play Activity, Group Discussion & Debate (Acceptance & Arguing each other's view points), Verbal & Non-Verbal Communication.

| 4 | 2 | 0 | 5 | 60 | 00 | 40 | 00 | 100 |

**Course Objectives:**

1. To provide mathematical knowledge and skills needed to support their concurrent and subsequent engineering studies.
2. To provide an ability to apply knowledge of basic science and engineering fundamentals.
3. To provide an ability to undertake problem identification, formulation and solution.
4. To provide an ability to analyze different mathematical models within science and technology and work creatively, systematically and critically.
5. To provide an ability to find strategies for the solution of different types of mathematical models using knowledge about the possibilities and limitations of the different methods and tools.
6. To provide an ability to develop abstract, logical and critical thinking and the ability to reflect critically upon their work and work of others.
7. To provide an ability to insight their strengths and weakness as learners and to appreciate the value of errors or mistakes as powerful motivators to enhance learning and understanding.

**CONTENTS**

**UNIT I** **Infinite Series** **8 hrs.**

Standard Infinite Series: Geometric Series and Harmonic Series
Tests for Convergence and Divergence
Comparison Test, Cauchy's Integral test, D'alembert's ratio Test, Cauchy's nth Root Test

Alternating Series Leibnitz's Theorem, Absolute Convergence and Conditionally Convergence, Power Series

**UNIT II** **Multiple Integration** **13 hrs.**

Curve Tracing: Curves in Cartesian and Polar Form
Reduction Formulae
Double Integral, Change of order of Integration in Double integral
Change of Variables in Double Integral from Cartesian to polar
Application of Double Integral to find area and volume
Triple Integral

**UNIT III** **Linear Algebra** **14 hrs.**

Eigen Values and Eigen Vectors - Properties of Eigen Values and Eigen Vectors
Cayley-Hamilton Theorem – Diagonalization, Powers of a Matrix
Real Matrices: Symmetric, Skew Symmetric, Orthogonal
Complex Matrices: Hermition, Skew Hermition, Unitary Matrices.

**UNIT IV** **Vector Integral Calculus** **13 hrs.**

Vector Integration: Integration of a Vector Function of a Scalar Argument
Line Integrals: Work Done, Potential, Conservative Field and Area
Introduction to Surface Integrals, Volume Integrals
Green's Theorem in Plane, Stokes' Theorem, Gauss Divergence Theorem

**Text Books**

| 3 | 0 | 2 | 4 | 60 | 60 | 40 | 40 | 200 |

**Course Outcomes:**

1. To study the basic concepts of chemistry & Engineering Applications of Chemistry.
2. To address the principles of general chemistry and specific topics relevant to various engineering disciplines, wherein the students should apply this learning in their respective areas of expertise.
3. To present sound knowledge of chemistry fundamentals.
4. To enrich students to understand the role of Applied Chemistry in the field of science and engineering.
5. To inculcate habit of scientific reasoning to do the task rationally.
6. To develop an ability to identify, formulate & solve chemistry & Engineering related Problems.
7. To provide mathematical knowledge and skills needed to support their concurrent and subsequent engineering studies.
8. Understand the various basic concepts used in engineering and process calculations.
9. Use fundamental chemistry concepts with direct application to the built environment.
10. Solve chemistry problems typically found on the Fundamentals of Engineering exam.

**CONTENTS**

**UNIT I** **(A) Electrochemistry** **7 hrs.**

Conductance, Cell constant and its determination; Electrochemical Cell, Galvanic Cell, Electrolytic Cell, Types of electrodes, Single electrode potentials, Reference Electrodes, Standard Hydrogen Electrode (SHE), Standard Calomel Electrode (SCE), Quinhydrone Electrode, EMF series, Cell emf measurement, Nernst equation, Conductometric titrations, Numerical.

**(B) Corrosion** **6 hrs.**

Definition and types of corrosion, Dry (chemical corrosion), Wet (Electrochemical corrosion) and its mechanisms; Types of electrochemical corrosion, (differential aeration, galvanic, concentration cell, water line, pitting, stress, erosion and soil corrosion, Caustic embrittlement, Factors affecting on corrosion (Metallic and Environmental), Pourbaix diagram, Protective measures to control Corrosion, Sacrificial anode and Cathode process for corrosion control.

**UNIT II** **Water Treatment Technology** **10 hrs.**

Sources of water, Soft Water & Hard Water, Types of hardness, Units of hardness measurement, Impurities in water, Disadvantages of hard water, Determination of water hardness by EDTA method, Alkalinity of water and its significance, Boiler feed water, Scale and sludge formation in boilers and pipes etc , Boiler Corrosion, Water softening through Soda lime process, Zeolite Process & Ion-exchange Process, Characteristics of Potable water, Specifications for drinking water (BIS and WHO standards), Sources and quality of drinking water, Treatment of water for domestic use: Filtration, Coagulation, Sedimentation and Disinfection, Concept of water harvesting, storage and recycling. Desalination through Electro Dialysis & Reverse Osmosis, Numerical problems.

**UNIT III** **(A) Dimensions, Units & Energy balances** **6 hrs.**

Dimensions and Units: Basic chemical calculations – atomic weight, molecular weight, equivalent weight, Mole concept, Inter-conversion of concentration units.
Material Balance without chemical reactions: Flow diagram for material balance, simple material balance with or without recycles or bypass.
Material Balance involves chemical reactions: concept of limiting reactant, conversion, yield, selectivity and liquid phase reaction, gas phase reaction with or without recycle or bypass.

**(B) Instrumental Techniques** **6hrs.**

Fundamentals of Spectroscopy; Principles and applications of UV-visible, IR, NMR, Mass & Atomic absorption Spectroscopy; Principles and applications of Chromatographic techniques including TLC, PC, Gas, HPLC.

**UNIT IV** **(A) Advance Organic Materials** **6 hrs.**

Liquid Crystals: Introduction, classification and applications, Organic Electronic Materials: Introduction, types and applications, Chemical Sensors: Introduction, types and applications, Ionic Liquids: Introduction and applications, Chromic Materials: Introduction, types and applications.

**(B) Catalysis & Adsorption** **7hrs.**

Catalysis: Types of catalysis, Positive & Negative catalysis, Homogeneous and Heterogeneous catalysis, Characteristics of Catalytic action, Poisoning of catalysis, Promoters, Auto Catalysis, Acid-Base Catalysis, Industrial Applications of Catalysts. Adsorption: Types of adsorption, adsorption isotherm: Freundlich adsorption isotherm, Langmuir adsorption Isotherm, Determination of surface area by BET method, Application of adsorption.

4. https://www.khanacademy.org/

**List of Practical:**

1. Determination of the alkalinity of unknown water sample.
2. Estimation of hardness of water sample by EDTA method.
3. Estimation of dissolved oxygen in water sample.
4. Determination of metal ions ($Ca^{2+}/Zn^{2+}$) from the mixture by EDTA titration.
5. Determination of metal ions ($Pb^{2+}/Mg^{2+}$) from the mixture by EDTA titration.
6. Determination of the concentration of chloride ions in unknown water sample.
7. Thin Layer Chromatography (TLC) and Paper Chromatography (PC).
8. Determination of strength of Acid or Base by pH meter.
9. Determination of strength of Acid or Base by Conductometer.
10. To calculate the Acid value of the given sample of oil.
11. Determination of the saponification value of a given oil sample.
12. Determination of iron content from unknown sample by spectrophotometer.

**Content**

**Unit - I**

1. **Introduction**
   Introduction to Mechanical Workshop, Safety, and Safety rules, Safety Slogans, Tools and Equipments used for safety purpose.

**Unit- II**

2. **Fitting Shop:**
   Introduction, Fitting materials, Tools and Equipments used in Fitting, Fitting Joints.
   1 Job in for practical demonstration

**Unit- III**

3. **Carpentry Shop:**
   Introduction, Carpentry materials, Tools and Equipments used in Carpentry, Carpentry Joints.
   1 Job in for practical demonstration

**Unit- IV**

4. **Welding Shop:**
   Introduction, Welding Tools, Equipments and Machines, Various Welding Joints
   1 Job in for practical demonstration

**Text Books**

1. Workshop Technology Vol. 1 and 2, by Raghuvanshi B.S. Dhanpat Rai & Sons 1998.

**Reference Books**

1. Mechanical Workshop Practice by K C John, PHI Learning.

2. Workshop Technology by Chapman W.A. J and Arnold E. Viva low priced student edition, 1998.

| 3 | 0 | 2 | 4 | 60 | 60 | 40 | 40 | 200 |

**Content**

**Unit - I**

1. **Basic Concepts of Thermodynamics**
   Basic units and dimensional analysis, Intensive and Extensive Properties, Energy, heat, temperature, specific heat capacity, Interchange of heat, change of state, mechanical equivalent of heat, Internal energy, enthalpy, entropy, efficiency, Open and Closed systems, statements of Zeroth Law, First law and its limitations, Second law of Thermodynamics

2. **Properties of Gases**
   Ideal and Real Gases, Gas laws, Boyle's law, combined gas law, gas constant, Internal energy, Relation between Cp and Cv, Enthalpy, Non flow process, constant volume process, Constant pressure process, Isothermal process, Poly-tropic process, Adiabatic process.

**Unit- II**

3. **Fuels and Lubricants**
   Different types of fuels, their properties and applications. Different types of lubricants, their properties and applications.

4. **Internal Combustion Engines**
   Classifications, Difference between I.C. and E.C. , Otto four-stroke engine, Diesel-four-stroke engine, Difference between Otto cycle and Diesel engine, Two-stroke engines, Difference between two- stroke and four-stroke engines, indicated power (ip), Brake power (bp), Efficiencies.

**Unit- III**

5. **Properties of Steam**

Introduction, steam formation, types of steam, enthalpy, specific volume of steam and dryness fraction of steam, Internal energy, steam tables, Measurement of dryness fraction throttling calorimeter, separating calorimeter, Combined calorimeter.

6. **Steam Boilers**
   Introduction, Classification, Simple vertical and horizontal boiler, Boiler details, Boiler performance. Functioning of different mountings and accessories.

**Unit- IV**

7. **Refrigeration and Air-conditioning**
   Introduction, Refrigerant, Vapor compression & absorption cycles & system, basic applications.

8. **Transmission of Motion and Power**
   Introduction, Couplings methods of drive, power transmission elements, shaft and axle, Belt-drive, pulleys, power transmitted by a belt, Chain drive, Friction drive, Gear drive.

**Text Books**

1. Basant Agrawal 'Basic mechanical Engineering' Wiley-India, 2008.

| Subject: **Computer Programming** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B.Tech All Branches** | | | | Subject Code: CE0001 | | | Semester: **I/II** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 3 | 0 | 2 | 4 | 60 | 60 | 40 | 40 | 200 |

**Course Outcomes:**

1. Identify the parts of the computer system.
2. Adequately explain functioning of computer components.
3. Explain the process of problem solving using computer
4. Design an algorithmic solution for a given problem
5. Write a maintainable C program for a given algorithm.
6. Trace the given C program manually.

**Contents:**

| Unit No | Sub unit | Name of Topic | Hours |
|---|---|---|---|
| | | **UNIT 1** | |
| **1** | **1.1** | **Introduction to Programming**<br>What is programming?, Problem solving methods with examples- Algorithm and Flowchart, Types of Programming languages ,Characteristics of higher level language, Some Programming languages | **4** |
| | **1.2** | **Introduction to 'C'**<br>Introduction, Importance of C, Sample C programs, Basic structure of C programs, Programming style, executing a C program. | **3** |

| | | | |
|---|---|---|---|
| | | Introduction, Character Set, C tokens, Keywords and Identifiers, Constants, Variables, Data types, Declaration of Variables, Defining symbolic constants. | |
| | **1.3** | **Operators and Expression:**<br><br>Introduction, Arithmetic of Operators, Relational Operators, Logical Operators, Assignment Operators, Increment and Decrement Operators, Conditional Operators, Bitwise Operators, Special Operators, Arithmetic Expressions, Evaluation of expressions, Precedence of arithmetic operators, Type conversions in expressions, Mathematical function. | **4** |
| | | **UNIT 2** | |
| **2** | **2.1** | **Decision Making Statements**<br><br>Introduction, Decision making with IF statement, Simple IF statement, the IF ELSE statement, Nesting of IF … ELSE statements, The ELSE IF ladder, The switch statement, the turnery (? :) Operator, the GOTO statement, | **4** |
| | **2.2** | **Looping**<br><br>WHILE statement, the DO statement, The FOR statement, Jumps in loops Break and continue. | **5** |
| | **2.3** | **Array & Handling of Character strings:**<br><br>Introduction, One-dimensional arrays, Two-dimensional arrays, Initialization of two dimensional arrays, Concept of Multidimensional arrays. | **4** |
| | | **UNIT 3** | |
| **3** | **3.1** | **Handling of Character strings:**<br><br>Introduction, Declaring and initializing string variables, Reading string from terminal, Writing string to screen, Arithmetic operations on characters, Putting string together, String Operations : String Copy, String Compare, String Concatenation and String Length, String Handling functions, Table of strings | **5** |
| | **3.2** | **User-Defined Functions :**<br><br>Introduction, Need for user-defined functions, Return values and their types, Calling a function, category of functions, No arguments and no return values, Arguments with return values, Handling of non-integer functions, Nesting of functions, | **5** |

| | | | |
|---|---|---|---|
| | | Recursion, Functions with arrays, The scope and Lifetime of variables in functions. | |
| | | **UNIT 4** | |
| **4** | **4.1** | **Pointers:**<br><br>Introduction, Understanding pointers, Accessing the address of variable, Declaring and initializing pointers, Accessing a variable through its pointer, Pointer expressions, Pointer increments and scale factor, Pointers and arrays, Pointers and character strings, Pointers and Functions, Pointers and structures | **5** |
| | **4.2** | **Structures and Unions:**<br><br>Introduction, Structure definition, Giving values to members, Structure initialization, Comparison of structures, Arrays of structures, Arrays within structures, Structures within Structures, Structures and functions, Unions, | **2** |
| | **4.3** | **Introduction to Object Oriented Concepts & Programming**<br>Review of fundamental concepts of Object-oriented programming,<br>Introduction to C++, class and objects, Functions in C++,Constructors & Destructors | **4** |
| | | **TOTAL** | **45** |

**Text Books:**

1. Programming in ANSI C, by Balagurusamy, Publisher - Tata McGraw Hill.
2. Object-oriented programming with C++,E.Balagurusamy, 2nd Edition, TMH.

**Reference Books:**

1. Introduction to C by Reema Thareja, Publisher-Oxford
2. Programming with ANSI and Turbo C, by Ashok N Kamthane, Publisher – Pearson Education.
3. Let us C, by Yashwant Kanitkar, Publisher – BPB Publication

## Course Objectives:

1. To provide fundamental knowledge of Engineering Mechanics.
2. To make students realize the importance of applications of engineering Mechanics in their day to day life.
3. To focus on the applicability aspect of the subject in their respective branch.

## Course Outcomes:

1. Students will be able to understand the fundamentals of mechanics.
2. Students should be able to apply the knowledge of Engineering Mechanics to solve complex Problems by making them comprehensible and simple.
3. Students should be able to construct free-body diagrams.
4. To calculate the reactions necessary to ensure static equilibrium.
5. Students will be able to calculate centre of gravity and moment of inertia.
6. Students can analyse the dry surfaces in contact with each other considering friction between Surfaces.
7. Students will be able to determine the parameters of motion for the bodies in motion.

## COURSE CONTENTS

### UNIT - I (08 HRS)

**Introduction:** Beginning and Development of Engineering Mechanics, Fundamental Principles of Mechanics, Idealizations in Mechanics, Branches of Mechanics, Units.

**Coplanar Forces:** Effect of Force, Characteristics of Force, Principle of Transmissibility of Forces, System of Forces, Resultant Force, Composition of Forces, Methods for Resultant Force, All major Laws of Forces, Principle of Equilibrium, Analytical Method for the Equilibrium of Coplanar Forces, Lami's Theorem.

**Non-Coplanar Forces**: Moment of a Force, Graphical Representation of Moments, Types of Moments, Varignon's Principle of Moments, Application of Moments, Levers, Types of Levers.

**UNIT - II** **(12 HRS)**

**Beams:** Types of Loads, Types of Supports, Types of Beams, Analytical Method for Determination of Support Reactions of a Beam (Simply Supported Beam, Cantilever Beam).

**Friction:** Static Friction, Limiting Friction, Normal Reaction, Angle of Friction, Coefficient of Friction, Laws of Friction, Equilibrium of a Body on a Rough Horizontal Plane, Equilibrium of a Body on a Rough Inclined Plane, Equilibrium of a Body on a Rough Inclined Plane Subjected to a Force Acting Along the Inclined Plane, Equilibrium of a Body on a Rough Inclined Plane Subjected to a Force Acting Horizontally. Ladder & Wedge Friction.

**UNIT - III** **(13 HRS)**

**Centre of Gravity:** Centroid, Methods for Centre of Gravity, Centre of Gravity by Geometrical Considerations, Axis of Reference, Centre of Gravity of Plane Figures, Centre of Gravity of Symmetrical Sections, Centre of Gravity of Unsymmetrical Sections, Centre of Gravity of Solid Bodies, Pappus Guldinus Theorem.

**Moment of Inertia**

Moment of Inertia of Plane area, Methods for Moment of Inertia, Moment of Inertia by Integration Method, Moment of Inertia of simple lamina, Parallel and Perpendicular Axis Theorem, Moment of Inertia of Built-up Section.

**UNIT IV** **(15 HRS)**

**Graphical Method:** Method for the Resultant of two Co- Planar forces, Equilibrium of Coplanar Forces (Force Polygon), Funicular Polygon Method to find Support Reactions, Graphical Method for determination of CG, MI.

**Kinematics & Kinetics:** Linear Motion, Relative Motion, Rectilinear Motion of Particle, Curvilinear Motion of Particle Newton's Second Law of Motion, Work, Work Done by Force, Energy, Law of Conservation of Energy, Work- Energy Principle, Power, Efficiency.

**Mechanical Vibrations:** Simple Harmonic Motion, Vibrations, D'alembert's Principle, Classification of Vibration, Damping and Vibration, Derivation of Free Vibration without Damping

**Text Books:**

1. R C Hibbler, ‘Engineering Mechanics’, Pearson Publication.

**Reference Books:**

1. Ferdinand P. Beer & E. Russell Johnston, “Statics and Dynamics”- McGraw Hill Publication.
2. S. Ramamrutham, ‘Engineering Mechanics’, Dhanpat Rai Publication.
3. Basudeb Bhattacharya, ‘Engineering Mechanics’, Oxford University Press.
4. R S Khurmi, ‘Engineering Mechanics’, S Chand Publication.
5. S B Junnarkar, H J Shah, ‘Applied Mechanics’, Charotar Publishing House.

**Web Resources:**

| Subject: **Environmental Science** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B.Tech All Branches** | | | | Subject Code: CV0001 | | | Semester: **I/II** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 1 | 0 | 2 | 2 | 24/60 | 24/60 | 16/40 | 16/40 | 200 |

**Course Objectives:**

1. To make students understand the importance of Environment in their day to day life.
2. To make students familiar with environmental Bio-diversity and related concepts.
3. Also to make students familiar with environmental legislations.

**Course Outcomes:**

1. Students will be able to understand the studies and importance related to environmental problems.
2. Students will be able to understand the legal procedures pertaining to environmental legislations
3. Students should be able to apply the knowledge gained in their respective branches of engineering & technology.

**Course Contents:**

**UNIT I** **(04 HRS)**

Concepts of Environmental Sciences: Environment, Levels of organizations in environment, Structure and functions in an ecosystem; Biosphere, its Origin and distribution on land, in water and in air, Broad nature of chemical composition of plants and animals, Natural Resources: Renewable and Non-renewable Resources, Forests, water, minerals, Food and land (with example of one case study); Energy, Growing energy needs, energy sources (conventional and alternatives)

**UNIT II** **(05 HRS)**

Biodiversity and its conservation: Biodiversity at global, national and local levels; India as a mega-diversity nation; Threats to biodiversity (biotic, abiotic stresses), and strategies for conservation. Environmental Pollution: Types of pollution- Air, water (including urban, rural, marine), soil, noise, thermal, nuclear; Pollution prevention; Management of pollution- Rural/Urban/Industrial waste management [with case study of any one type, e.g., power (thermal/nuclear), fertilizer, tannin, leather, chemical, sugar], Solid/Liquid waste management, disaster management.

**UNIT III** **(04 HRS)**

Environmental Biotechnology: Biotechnology for environmental protection- Biological indicators, bio-sensors; Remedial measures- Bio-remediation, phytoremediation, bio-pesticides, bio-fertilizers; Bio-reactors- Design and application. Social Issues and Environment: Problems relating to urban environment- Population pressure, water scarcity, industrialization; remedial measures; Climate change- Reasons, effects (global warming, ozone layer depletion, acid rain) with case studies.

**UNIT IV** **(05 HRS)**

Legal issues- Environmental legislation (Acts and issues involved), Environmental ethics. Environmental Monitoring: Monitoring- Identification of environmental problem, tools for monitoring (remote sensing, GIS); Sampling strategies- Air, water, soil Sampling techniques.

**Text Books:**

1. R C Hibbler, 'Engineering Mechanics', Pearson Publication.

**Reference Books:**

1. Ferdinand P. Beer & E. Russell Johnston, "Statics and Dynamics"- McGraw Hill Publication.
2. S. Ramamrutham, 'Engineering Mechanics', Dhanpat Rai Publication.
3. Basudeb Bhattacharya, 'Engineering Mechanics', Oxford University Press.
4. R S Khurmi, 'Engineering Mechanics', S Chand Publication.
5. S B Junnarkar, H J Shah, 'Applied Mechanics', Charotar Publishing House.

**Web Resources:**

1. http://nptel.ac.in/courses/122102004/
2. http://textofvideo.nptel.iitm.ac.in/122102004/

**List of Practicals:**

1. Plotting of bio geographical zones and expanse of territorial waters on the map of India.
2. Identification of biological resources (minimum 20) (plants, animals, birds) at a specific locations.
3. Determination of:
   (i) pH value

(ii) Water holding capacity
(iii) Electrical conductivity of different types of soils.

4. Determination of energy content of plants by bomb calorimeter.
5. Measurement and classification of noise pollution.
6. Determination of particulate matter from an industrial area by high volume sampler.
7. Determination of ico-chemical parameters (Alkalinity, Acidity) of tap water well water, rural water supply industrial effluent and sea water & potability issues.
8. Determination of ico-chemical parameters (Salinity, COD, BOD) of tap water well water, rural water supply industrial effluent and sea water & potability issues.
9. Demonstration of Remote Sensing and GIS methods.
10. Understanding Environmental Biotechnology Processes.

| Subject: **Business Communication and Presentation Skills** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B.Tech All Branches** | | | | Subject Code: SH0202 | | | Semester: **II** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 1 | 2 | 0 | 2 | 60 | 00 | 40 | 00 | 100 |

**Course Objectives:**

1. To orient students about the varied uses of business communication.
2. Under the importance of personality and its reflection in communication.
3. Train students to develop business correspondence in writing and presentation skills.

**Course Content:**

**Unit 1:**
**Business Communication**- **Role of Communication in Information Age**, concept and meaning of communication; skills necessary for technical communication; Communications in a technical organization; Barriers to the process of communication. Style and organization in technical communication covering, Language skills, Objectivity, clarity, precision, and organizational etiquettes as defining features of technical communication.

**Unit 2:**
**Effective Presentation Skills-**Oral Presentation and professional speaking, Elements of effective presentation; Planning and preparing a model presentation; organizing the presentation to suit the audience and context; Basics of public speaking and Group Discussion.

**Unit 3:**
**Reading**- Intensive reading, Predicting content, Interpretation, Inference from text, skimming & scanning techniques of reading, Critical Interpretation, Editorial of newspapers.

**Unit 4:**
**Writing:** Basic Writing skill development & Paragraph development(Unity, coherence, cohesive devices), Letters; Inquiry- reply to inquiry, Complain, request , business letters, Using e-mail for business communication; Language in e-mail.

**Reference Books:**

1. Fred Luthans, Organizational Behaviour, McGraw Hill
2. Lesikar and petit, Report writing for Business
3. M. Ashraf Rizvi, Effective Technical Communication, McGraw Hill
4. Wallace and masters, Personal Development for Life and Work, Thomson Learning
5. Hartman Lemay, Presentation Success, Thomson Learning
6. Malcolm Goodale, Professional Presentations
7. Farhathullah, T. M. Communication skills for Technical Students
8. Michael Muckian, John Woods, The Business letters Handbook
9. Herta A. Murphy, Effective Business Communication
10. Lehman, Dufrene, Sinha BCOM, Cengage Learning

Approved Vide Agenda Item No. 03 of Minutes of Meeting of Academic Council held on 11 July 17

| Subject**: Differential Equations and Integral Transforms** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | Subject Code: SH0301 | | | | Semester**: III** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 3 | 2 | 0 | 4 | 24/60 | 0 | 16/40 | 0 | 100 |

**1. Course Outcomes :**

- To provide an ability to see differential equations as a rigorous way of modeling physical phenomena.
- To provide an ability to derive major differential equations from physical principles.
- To provide an ability to understand the role of initial and boundary conditions in determining the solutions of equations.
- To provide an ability to choose and apply appropriate methods for solving differential equations.
- To provide an ability to undertake problem identification, formulation and solution.
- To provide an ability to calculate Laplace transforms and inverse Laplace transforms and uses them to solve differential equations (Initial value problems, Boundary value problems).
- To provide an ability to understand various concepts of Control System -Theory using Laplace Transform.
- To provide an ability to obtain Fourier series for simple periodic functions
- To provide an ability to understand Oscillation and Vibration related problems using Fourier Series and transform
- To provide an ability to obtain solution of the differential equations in form of the series using power series method.
- To provide an ability to communicate effectively with professionals within applied and engineering mathematics as well as with persons working with different scientific-technological applications in an interdisciplinary context.
- To provide an ability to develop abstract, logical and critical thinking and the ability to reflect critically upon their work and work of others.
- To provide an ability to insight their strengths and weakness as learners and to appreciate the value of errors or mistakes as powerful motivators to enhance learning and understanding.
- To provide an ability to interlink various engineering fields with Mathematics.
- To provide mathematical knowledge and skills needed to support their concurrent and subsequent engineering studies.

## 2. Contents:

| | | Time Allotted |
|---|---|---|
| **Unit 1** | **Ordinary Differential Equations with applications:** Revision of ordinary differential equation: Introduction of Mathematical Modeling, Basic Definitions, First Order First Degree Differential Equations, Variable Separable equation, Homogeneous Equation, Exact Differential Equations, Reduction of Non-exact Differential Equations to exact form using Integrating Factors, First Order Linear Differential Equation, Bernoulli Equation, Applications: Orthogonal Trajectories, Simple Electric Circuits, Solution of Linear differential equations of higher order with constant coefficients, complimentary function and particular integral | **10 hours** |
| | | |
| **Unit 2** | **Ordinary and Partial Differential Equations with applications:** Method of variation of parameters, Method of Undetermined coefficients, Linear differential equations with variable coefficients (Cauchy's and Legendre forms), Simultaneous linear differential equations, Bessel and Legendre functions, Application of Linear differential equation - Application ofDeflection of Beams, Electric circuits, Series Solution of Ordinary Differential Equations – Power series method, Formation of Partial differential equations, Directly Integrable equations, Method of separation of variables, solution of one dimensional wave equation, heat equation and Laplace equation. | **10 hours** |
| | | |
| **Unit 3** | **Laplace transforms:** Relation between Laplace and Fourier Transform, Definition, Linearity property, Laplace transforms of elementary functions, Shifting theorem, Inverse Laplace transforms, Laplace transforms of derivatives and integrals, Convolution theorem, Application of Laplace transform in solving ordinary differential equations, Laplace transforms of periodic, Unit step and impulse functions | **10 hours** |
| | | |
| **Unit 4** | **Fourier series, Fourier Integrals, Fourier Transforms and Z-Transforms:** Fourier series, Drichlet's conditions, Euler's formula, Fourier expansion of periodic functions, Fourier series of even and odd functions, Half range Fourier series, Fourier integral theorem (only statement), Fourier sine and cosine integrals, Complex form of Fourier integral, Fourier transforms, Fourier sine and cosine transforms, Introduction to Z-transforms: Definition and Standard Z-transforms, Linearity Property, dumping Rule and some standard results, Some useful Z-transforms | **12 hours** |

**3. Text books:**

1) Erwin Kreyszig: Advanced Engineering Mathematics (8th Ed.) , Wiley Eastern Ltd., New Delhi.

**4. Reference Books:**

1) B. V. Ramana: Higher Engineering Mathematics, Mc Graw Hill, New Delhi.
2) Dr. B.S. Growl: Higher Engineering Mathematics, Khanna Publishers, New Delhi.
3) R K Jain, S R K Iyengar: Advanced Engineering Mathematics. Third Edition, Narosa Publishing House
4) Merel C Potter, J L Goldberg: Advanced Engineering Mathematics (3rd Ed.), Oxford India Publication.
5) Murray Spiegel: Advanced Mathematics for Engineering & Science: (Schaum's Outline Series),Tata – McGraw Hill Publication

**5. Digital Resources**

http://freevideolectures.com/blog/2010/11/130-nptel-iit-online-courses/
http://nptel.ac.in/video.php?subjectId=122107036
http://ocw.mit.edu/index.htm
https://www.khanacademy.org/

**6. Activity Based Learning**

Branch specific projects will be given to students as under:

1) Electrical Circuit
2) Signal system
3) Deflection problems
4) Starching problems
5) Oscillations Problems
6) Forced vibration of an elastic string
7) Vibration of Beam
8) Electrostatic potential
9) Model of Mass, spring system, Circuits, Network
10) Vibrating cable or chain

| Subject: **Mineral Processing** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech** Metallurgical Engineering | | | Subject Code: MT0301 | | | Semester: **III** | | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 3 | 0 | 2 | 4 | 24/60 | 60 | 16/40 | 40 | 200 |

**1. Course Outcomes**

- To make the students aware about basics of mining technology.
- To impart the knowledge about the basic steps followed in mineral dressing and its importance before extraction of pure metal from their respective ores.
- To develop the knowledge regarding the auxiliary operation and the advancement in mining technology.

**2. Contents**

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | Introduction and scope of mineral processing in extractive metallurgy, mineral resources in India, physical characteristics exploited in mineral processing, terminology in mineral processing. Physical and chemical characteristics of industrial minerals i.e. hematite, magnetite, galena, chalcopyrite, azurite, monazite, cassiterite, chromite, bauxite, and ilmenite, economics of ore processing. | 8 hours |
| | | |
| **Unit 2** | Liberation and its significance, Comminution and sizing, Laws of comminution, Crushing and Grinding- types, equipment, washing, sorting and hand-picking ; Laboratory and industrial screening- equipment, screen efficiency. | 10 hours |
| | | |
| **Unit 3** | Classifier- mechanical and hydraulic, sizing and sorting, classifiers, Mill calculation and Selectivity index. Gravity concentration methods, Tabling, Jigging, Heavy media separation, Separation in vertical and streaming currents, Sedimentation, Dewatering, techniques, Thickener, Filtration and Drying. | 10 hours |
| | | |
| **Unit 4** | Froth flotation: principles, reagents, collectors, modifiers and frothers, process variables in floatation, Tailings disposal, Process integration and, Study of flow sheet for important minerals.<br>Magnetic and Electrostatic separation: principles, wet and dry separators, High tension separation, Motion of solid in fluid, Strokes and Newton's law, Free and hindered settling, Thickening, Batch and continuous settling, chambers. Application of computer in mineral processing. | 10 hours |

### 3. Mineral Processing Lab (List of Experiments)

| Experiment No. | Title |
|---|---|
| **1** | To study the crushers (primary and secondary ) like jaw crusher and roll crusher and to measure their reduction ratios and capacities |
| **2** | To determine the reduction ratio of Coal. |
| **3** | To determine the reduction ratio of Coke. |
| **4** | To determine the reduction ratio of Iron ore. |
| **5** | To determine the reduction ratio of Ceramic material. |
| **6** | To study the sieve analysis of weighed powder sample |
| **7** | To study the ball mill and measure the grind ability of Ball mill |
| **8** | To determine the grindability of Coal. |
| **9** | To determine the grindability of coke. |
| **10** | To determine the grindability of Iron ore. |
| **11** | To determine the grindability of ceramic material. |
| **12** | To study the principle , operation and efficiency of laboratory classifier |
| **13** | To determine the efficiency of magnetic separation by varying strength of magnetic field |
| **14** | To study the coal and gravel separation using jig |
| **15** | To study the froth flotation of given sample of coal |

### 4. Text Book(s)

1) Principles of mineral dressing, by S.K.Jain. (2013)

### 5. Reference Books

1) Principles of Mineral Dressing, A. M. Gaudin, Tata McGraw Hill.(1980)
2) Mineral Processing Technology, B. A. Wills, Pergamon Press.(1992)
3) Introduction to Mineral Processing, E. G. Kelly and D. J.Spottiswood, John Wiley & Sons. (1982)
4) Extraction Metallurgy, J. D. Gilchrist, Pergamon Press.(2006)

5) Extractive Metallurgy, Joseph Newton, Wiley Eastern.(1966)
6) Mineral Processing, E. J. Pryor, Pergamon Press.(1965)
7) Extraction of Non-ferrous Metals, H. S. Ray and K. P. Abraham, Affiliated East West Press. (2006)
8) Experiments in Mineral Processing, S. Venkatachalam. (2011)

**6. Digital Learning Resources :**

*www.youtube.com/watch?v=YO23kmDdLf8*
www.youtube.com/watch?v=ZrJtzCfoqxI

**7. Question Paper Pattern for End Sem Exam** :

As per Appendix A

| Subject: **Structural Metallurgy & Physics of Materials** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | | Subject Code: MT0302 | | | Semester: **III** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 3 | 2 | 0 | 4 | 24/60 | 0 | 16/40 | 0 | 100 |

## 1. Course Outcomes

- To provide knowledge about the basic structure of metals and alloys, which are the building block for developing macro and micro structure of metallic materials
- To provide knowledge about metallic and non-metallic type of bonding and their differentiation.
- To teach them about concept of polymorphism and others.
- To solve different numerical pertaining to crystal structure determination & phase diagram determination
- To give them knowledge about diffusion in solids.
- To teach them basics on nucleation and growth and its applications.
- To teach them about crystal defects in metallic materials their origin, causes and remedial measure.
- To provide basic knowledge about properties of materials such as electrical and thermal Conductivity, magnetism, dielectric properties.

## 2. Contents

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | Atomic Structure, types of bonds; ionic bonds, covalent bonds, Van der Waals bonds, metallic bonds, metallic properties; crystalline vs. non-crystalline solids. Inter-atomic Bonding. Interatomic distances.<br>Equilibrium & Kinetics: Macro and micro structure in metallic materials, levels of structure, structure property relationships in materials, Equilibrium & kinetics: stability & met stability, Basic thermodynamic functions, The statistical nature of entropy, The kinetics of thermally activated processes. | 12 hours |
| | | |
| **Unit 2** | The Structure of Crystalline Solids: Crystalline & non crystalline states, covalent solids, Metals & alloys. Ionic solid, unit cell, space lattice, Crystal geometry, crystal systems & Miller- Bravais lattices, Polymorphism or allotropy**,** direction & planes, slip planes, atom sizes and coordination. Co-ordination Number, atomic packing factor. Single crystal, Polycrystalline & Non crystals. | 10 hours |

| | | |
|---|---|---|
| **Unit 3** | Isotropy & Anisotropy, Homogenous & Heterogeneous. Types of deformation elastic & anelastic deformation, viscoelastic behavior, work hardening & strain hardening, dislocation & strain aging, The Bragg's Law. Diffraction methods, structure factor and its determination, Crystal structure determination, Crystallite size determination | 10 hours |
| | | |
| **Unit 4** | Glass transition, Conductors and Resistors: The resistivity range, Free electron theory, conduction by free electrons, conductor, Semi-conductor, insulators and resistor materials.<br><br>Ferromagnetism, diamagnetism, paramagnetism, superconductivity, dielectric behavior, thermal conductivity principles. | 8 hours |

**3. Text Book(s)**

1) Structure of Metals – Crystallographic Methods, Principles & Data- Charles S. Barret & T.B.Massalski, Eurasia publishing house(Pvt.)Ltd., New Delhi(2004)
2) Theoretical Structural Metallurgy – A.H.Cottrell, The English Language Book Society & Edward Arnold (Publishers) Ltd., U.K.(1959)
3) Elements of X-ray diffraction – B.D. Cullity, Addison – Wesley Publishing Company Inc., U.S.A(1956)
4) Physical Metallurgy Principles – Robert E-Reed-Hill, Affiliated East-West Press Private Ltd., New Delhi.(1991)

**4. Reference Books :**

1) Materials Science & Engineering by V.Raghavan 4th edition, PHI Pvt. Ltd. New Delhi

**5. Digital Learning Resources**

MIT Open Courseware: http://ocw.mit.edu/OcwWeb/Materials-Science-and-Engineering/

Defects in Crystals: http://www.tf.uni-kiel.de/matwis/amat/def_en/

Hyper Physics: http://hyperphysics.phy-astr.gsu.edu/hbase/hframe.html

**6. Question Paper Pattern for End Sem Exam** :

As per Appendix A

| Subject**: Fuel Furnace & Refractories** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | | Subject Code: MT0303 | | | Semester**: III** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 3 | 2 | 0 | 4 | 24/60 | 0 | 16/40 | 0 | 100 |

**1. Course Outcomes:**

- Students will understand use of fuels and refractories in the different levels of the operational systems.
- Students will gain the knowledge of various types of high temperature changes and also the mode of fabrication for such changes used in the research areas and how to design those operations.
- Students can develop creativity for Pyro- Research.
- Co-relating the basic of the mechanical and high temperature properties and individual response and related over all logical changes and uses of the respective materials.
- Students can predict effectively and accurately the reasons of faults related to temperature and then correlate how to rectify.
- Students will know various considerations like laws of physics, chemistry and also factors of safety etc.
- Students will know of basic principles, working principles laws, related details, graphical details, applications and also a comparison study with each other.

**2. Contents**

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | **Fuels:** Classification of fuels, solid, liquid and gaseous fuel-their advantages and limitations, Comparative study of solid, liquid and gaseous fuels, Combustion of fuels, Combustion characteristics of fuel, Analysis and testing of fuels, Carbonization of coal-coke making and by products, producer gas, water gas, natural gas, LPG, Blast Furnace gas, Coke oven gas, LD gas, storage of Fuels in transport, nuclear fuel, other energy resources such as Solar, Wind, Geothermal, Bio-mass, Hydrogen, Nuclear Energy. | 8 hours |
| | | |
| **Unit 2** | **Furnaces and Furnace Design:** Classification based on heating methods, application wise and temperature ranges, Batch furnaces, continuous furnaces, Construction and working of furnaces like Cupola, Induction Furnace, Electric Arc Furnace, Resistance Furnace, Pit | 10 hours |

| | | |
|---|---|---|
| | furnace, Rotary Furnace, Muffle Furnace, Modern furnaces: plasma heating Furnace accessories (Burners, blowers, pumps, chimneys, drafts), thermal interactions in furnace, furnace atmosphere, heat economics, Furnace capacity and efficiency along with factors affecting it. Related numerical. | |
| | | |
| **Unit 3** | **Refractories:**<br>Introduction, concept of Refractoriness, requirements of good refractory material, classifications, types of the refractories and their individual manufacturing processes, Refractory properties, Testing and related machineries and how to control those machineries, a comparative study of the ternary phase diagram of different types of refractories, Details of Blast furnace refractory and LD Converters of Ladles, Castable refractory – preparation, fabrication and uses, Supper Refractories and their uses. Refractories numerical. | 10 hours |
| | | |
| **Unit 4** | **Pyrometry:**<br>Basic concept of temperature measurement and control, Stefan's Boltzmann's theory and<br>related ideas in temperature measurement, Thermometry, resistance thermometer - principle, constructional details, applications, Principle of thermocouple, construction and calibration of thermocouple, Different types of thermocouple for measurement of various temperature ranges, Optical Pyrometer and Radiation Pyrometer – Principle, construction, working principle, advantages, comparative study of Optical Pyrometer and Radiation Pyrometer | 8 hours |

**3. Text Book(s)**

1) O. P. Gupta, Elements of Fuels, Furnaces and Refractories, Khanna Publishers, 1998.

**4. Reference Books**

1) J. D. Gilchrist, Fuels, Furnaces and Refractories, Pergamon, 1977
2) W. Trinks, M. H. Mawhinney, Industrial Furnaces, John Wiley and Sons, 6th Edition, 2003.

**6. Question Paper Pattern for End Sem Exam :**

As per Appendix A

| Subject**: Physical Metallurgy of Ferrous Alloys** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | | Subject Code: MT0304 | | | Semester**: III** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 3 | 2 | 2 | 5 | 60 | 60 | 40 | 40 | 200 |

**1. Course outcomes**

**After completion of this course students will be able to gain knowledge about following**

Physical metallurgy is the study of the structure of metals and its influence on material properties and performance. It is an essential component of many areas of mechanical, manufacturing, civil, and materials engineering in the aerospace, automobile, transportation, energy, environmental, biomedical, and electronics industries as well as in engineering research and design for military and government applications. The courses in the minor provide the student with a broad introduction to the engineering science principles and applications associated with physical metallurgy.

**2. Contents**

| | | **Allotted hours** |
|---|---|---|
| **Unit1** | Introduction, solid Solution, Types of solid solution, Hume-Rothery Rules for Primary Substitutional Solid Solubility, Types of Interstitial Voids, Chemical compounds versus solid solution, Intermediate Phases, Polycrystalline Materials, Grain Size, Measurement of Grain Size, Multiple –Phase Alloys. Intermetallic compounds.<br>Solidification of Metals & Alloys: Structure of Liquid Metals, Energetic of Solidification, Nucleation and growth phenomena, Homogenous & Heterogeneous Nucleation, Growth of Solid, Smooth or Stable interface growth, Temperature Inversion in pure Metals, Segregation, Porosity. Numericals. | 10 hours |
| | | |
| **Unit2** | Concepts of alloy system and explanation of terms like system, component, phase, micro constituent and degree of freedom, structural constituent of an alloy, phase rule and phase equilibria, equilibrium diagrams and their classification based on solubility of components in liquid and solid states, cooling curves, morphology and distribution of phases, effect of non-equilibrium cooling on morphology. Constitutional super cooling Unary | 8 hours |

| | | |
|---|---|---|
| | Diagram, Binary Phase Diagram, Use of Phase Diagram, Determination of Phase Diagrams, Limitation of Equilibrium Diagram, Zone Melting, Ternary Diagram, Numerical, Interpretation of Phase Diagram, Interpretation of Phase Diagram by using Lever Rule | |
| | | |
| **Unit3** | **Fe-Cementite Diagram**<br>Introduction, Allotropy of Iron, Cooling & Heating curves of Pure Iron, Effect of pressure on allotropy of Iron, Iron- carbon equilibrium diagram, phase Fe- Cementite diagram. Effect of Alloying element on Fe- Cementite diagram, effect of carbon on Fe- Cementite. Critical temperature in Fe-Cementite diagram.<br>Physical significance of grain size: Grain size effects, Grain size designation, Grain size measurement. Interpretation of Phase Diagram. | 10 hours |
| | | |
| **Unit4** | **Steels**<br>Classification and application of carbon steels, Plain carbon steels, Advantages and limitations of Plain carbon steels, Effect of impurity elements on the properties of steels, Purpose of alloying of steel, Functions of alloying elements in steel, Effects of alloying elements on the properties of steels, Steel Specifications-according to AISI, Indian grades, and UNS.<br>**Cast Iron**<br>Introduction, Cast Irons, Various Types, Properties & Applications, ADI – Austempered Ductile Cast Iron. Cast Iron Specifications – according to AISI and Indian Grades.<br>**Metallography**<br>Microscopic examination, Polishing techniques for different metals and alloys, Etching and Mounting techniques, Difference between Macro & Micro Etching, electrolytic polishing Metallurgical microscope, Macroscopic & Microscopic examination methods, Nonmetallic inclusions. | 10 ours |

### 3. Physical Metallurgy I Lab (List of Experiments)

| Experiment No | Title |
|---|---|
| **1** | Study of optical microscope. |
| **2** | Specimen preparation for metallography. |
| **3** | Study and preparation of etching agents |
| **4** | Mounting of specimen. |

| | |
|---|---|
| **5** | Plotting of Thermal Equilibrium Phase Diagram of Binary alloys and pure metal by Cooling Curve Method. |
| **6** | Application of Gibb's Phase Rule for confirming the accuracy of Unary and Binary Phase Diagrams |
| **7** | Microstructure observation of Pure metals |
| **8** | Application of Lever Rule for Phase, Phase Composition & Phase Fraction (Binary Alloys) |
| **9** | Microstructural observation of Steels. |
| **10** | Microstructural observation of Cast Irons. |
| **11** | Study of phase diagrams for structure-properties correlation. |
| **12** | Eutectic, Hypo- And Hyper-Eutectic Alloys: Al-Si (Unmodified), Al-Si (Modified), Pb-6wt%Sb, Pb- 11.1 Wt%Sb And Pb- 20 Wt%Sb |
| **13** | Peritectic And Monotectic Alloys: 60:40 ( + ) Brass, 70:30 ( ) Brass, Cu- 10wt%Sn, Cu- 36wt% Pb, Cu- 50 Wt% Pb* |
| **14** | Grain size measurement |
| **15** | Understanding SAE, AISI, UNS and Indian Standards for Steels. |

**4. Text books**

1) Physical Metallurgy – Vijendra Singh (2012)

**5. Reference books**

1) Physical Metallurgy Principles - Robert E Reed-Hill and Reza Abbaschian(2008)
2) Phase Transformation in Metals & Alloys - D A Porter & K Easterling(1992)
3) Physical metallurgy by Avner-(1997)
4) Physical Metallurgy - Peter Haasen(1996)
5) Structure and Properties of Alloys - R M Brick, R B Gordon, A. Phillips(2002)
6) Physical Foundations of Materials Science - G. Gottstein (2004)
7) Physical Metallurgy and Advanced Materials Engineering - R.E. Smallman and A.H.W. Ngan (2007)

**6. Digital learning resources**

http://nptel.ac.in/courses/113105024/

**7. Question paper pattern for end sem exam**

As per Appendix A

| Subject: **Environmental Pollution and Control in Metallurgical Industries** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | | Subject Code: MT0305 | | | Semester**: III** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 3 | 0 | 0 | 3 | 60 | 0 | 40 | 0 | 100 |

## 1. Course Outcomes:

- To understand the sources of Air pollution.
- To understand the various effects of pollution on human health, vegetables etc.
- From application point of view students can learn how to measure the air pollution
- It will help students to understand how to reduce or control the pollutants.

## 2. Contents

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | **Introduction:** Definition, air pollution episodes, general nature of air pollution problems<br><br>**Air Pollutants, Sources & their inventory:** Particulate matter, carbon dioxide, carbon Monoxide, sulphur oxide, effects of hydrocarbon, oxide of nitrogen, photochemical oxidants, asbestos and metals on materials and health. | 8 hours |
| | | |
| **Unit 2** | **Effects of Air Pollution:** Effects of air pollution on human, vegetation, animals and Materials.<br><br>**Meteorology:** Introduction, solar radiation, wind circulation, lapse rate, stability conditions, wind velocity profile maximum mixing depth, wind rose turbulence, and general characteristics of plumes, heat island effect, and global circulation of pollutants. | 10 hours |
| | | |

| | | |
|---|---|---|
| **Unit 3** | **Pollution in Metal Industries:** Pollution in Iron and Steel industries and Non-ferrous Metals (Cu, Al, Zn, and Pb) industries and its control, Pollution Control in Ferrous & Non-ferrous Foundries. | 10 hours |
| | | |
| **Unit 4** | Air pollution and control due to toxic and non-toxic gases, fumes, dust etc. during combustion, heating and roasting processes and industrial production, control methods, cleaning of gaseous effluents, recovery of economic value from gases.<br><br>Noise pollution Sources, effects and control<br><br>Odor problem Causes and control. | 10 hours |

**3. Text Book(s)**

1) Environmental Pollution Control Engineering by C S Rao, 2006.
2) Air Pollution Rao & Rao. - Tata McGraw-Hill Publishing Ltd, 2007.

**4. Reference Books**

1) Environmental Pollution Studies by Gerald Arthur Best, 1999.
2) Understanding Environmental Pollution by Marquita K. Hill, 2010.
3) Air Pollution Henry C. Perkins. - Tata McGraw-Hill Publishing Ltd, 1947.
4) Air Pollution, its origin and control Wark & Warner, 1998.
5) Environmental Pollution and Control by J. Jeffrey Peirce, P Aarne Vesilind, Ruth Weiner, 1998**.**

**6. Question Paper Pattern for End Sem Exam:**

As per Appendix A

| Subject: **Human values & professional Ethics** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | | Subject Code: SH0307 | | | Semester: **III** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 1 | 0 | 0 | 0 | 60 | 00 | 40 | 00 | 100 |

**Course Objectives:**

1. To create an awareness on Engineering Ethics and Human Values.
2. To understand social responsibility of an engineer.
3. To appreciate ethical dilemma while discharging duties in professional life.

**Contents:**

**Unit 1: Values and Self Development** **04 hours**

Social Values and individual Attitudes, Work ethics, Indian vision of Humanism, Moral and non moral valuation, Standards and principles, Value judgments. Importance of cultivation of values, Sense of duty, Devotion, Self reliance, Confidence, Concentration, Truthfulness, Cleanliness, Honesty, Humanity, Power of faith, National unity, Patriotism, Love for nature, Discipline.

**Unit 2: Personality and Behavior Development** **04 hours**

Soul and scientific attitude. Goad and scientific attitude, positive thinking, integrity and discipline, punctuality, love and kindness. Avoiding fault, finding. Free from anger, Dignity of labor, Universal brotherhood and religious tolerance, True friendship, Happiness vs. suffering love for truth. Aware of self destructive habits, Association and cooperation, doing best, saving nature.

**Unit 3: Character and Competence** **04 hours**

Science vs. God, Holy books vs. Blind faith, Self management and good health, Science of reincarnation, Equality, Nonviolence, Humility, Role of women, All religions and same message, Mind your mind, Self control, Honesty, Studying effectively.

**Unit 4: Engineering Ethics** **04 hours**

Senses of 'Engineering Ethics', variety of moral issues, types of inquiry, moral dilemmas, moral autonomy, Kohlberg's theory, Gilligan's theory, consensus and controversy, models of professional roles, theories about right action, self interest, customs and religions, uses of ethical

theories, Valuing time, Co-operation and commitment, Code of ethics, Sample codes – IEEE, ASCE, ASME and CSI.

## 2. Course outcome

After completion of this course students will be able to gain knowledge about following

- To provide an ability to understand, interpret and use the basic concepts: complex number, analytic function, harmonic function, Taylor and Laurent series, singularity, residue, conformal mapping, meromorphic function.
- To provide an ability to prove certain fundamental theorems about analytic functions, e.g. Cauchy's integral formula
- To provide an ability to determine the images of curves under simple complex mappings.
- To provide an ability to determine the stability of certain dynamical systems using complex functions.
- To provide an ability to use conformal mapping to solve certain applied problems regarding heat conduction, electrical engineering and fluid mechanics.
- To provide an ability to use Taylor and Laurent expansions to derive properties of analytic and meromorphic functions.
- To provide an ability to compute integrals by means of residues.
- To examine common numerical methods such as finite element and finite difference techniques, including the strengths and weaknesses of particular applications.
- To discuss the concept of approximation in geometric and engineering applications.
- To provide an ability to utilize a systems approach to design and operational performance.
- To provide an ability to formulate mathematical models, choose suitable methods to investigate these models including the efficient use of computer tools.
- To provide an ability to analyze zeros and poles of meromorphic functions, classify singularities
- To provide an ability to identify various mathematical problems and reformulate these in a way suitable for numerical treatment.
- To provide an ability to select a suitable numerical method for the treatment of the given problem.

- To provide an ability to solve various engineering problems including tabular data.
- To provide an estimate of the accuracy of the results.
- To provide an ability to communicate effectively with professionals within applied and engineering mathematics as well as with persons working with different scientific-technological applications in an interdisciplinary context.
- To provide an ability to develop abstract, logical and critical thinking and the ability to reflect critically upon their work and work of others.
- To provide an ability to interlink various engineering fields with Mathematics.
- To provide mathematical knowledge and skills needed to support their concurrent and subsequent engineering studies.

**3. Contents**

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | **Complex Analytic Functions:**<br>Complex Numbers, Demoivere's Theorem, Roots of Complex Numbers, Elementary complex functions, Complex planes, Curves in complex planes, Concept of neighborhood in The complex plane, Analytic function, Cauchy- Riemann equations (Cartesian and polar forms – without proof), Harmonic functions, conformal mappings, some standard conformal transformations. | 8 hours |
| | | |
| **Unit 2** | **Interpolation**<br>**Finite differences and Interpolation:** Finite differences Forward, Backward & Central difference operators and difference tables. Interpolation, Interpolation Formulae with equal intervals: Newton's forward, Newton's backward, Central difference interpolation by Stirling's formulae<br>**Interpolation Formulae with unequal intervals**: Lagrange's & Newton's divided difference interpolation<br>**Numerical Integration:** Trapezoidal rule, Simpson's 1/3 rule, Simpson's 3/8 rule.<br>**Numerical differentiation**: Using Newton's forward and backward interpolation formula | 10 hours |
| | | |
| **Unit 3** | **Numerical Methods:** Basic Errors.<br>**Solution of Algebraic and Transcendental Equations:** Bisection method, Regula-Falsi method, Newton-Raphson method, Convergence condition for these methods. | 10 hours |

| | | |
|---|---|---|
| | **Numerical methods in Linear Algebra:** Gauss-Jacobi, Gauss-seidel method<br>**Largest Eigen values and corresponding Eigen vectors**: By power method<br>**Numerical Solutions of ordinary differential equations:** Taylor's Method, Euler's Method, Improved Euler Method (Heun's Method), Runge-Kutta method of order four | |
| | | |
| **Unit 4** | **Complex Integration:** Complex integration, Cauchy's integral theorem and Cauchy's integral formula (without proof), Singularities, Taylor's and Laurent's series, Cauchy-Residue theorem, Residues & Contour integration, Applications of residue to evaluate real integrals. | 10 hours |

| 3 | 0 | 2 | 4 | 60 | 60 | 40 | 40 | 200 |

## 1. Course outcomes

**After completion of this course students will be able to gain knowledge about following**

Due to specialized requirements, nonferrous alloys application are increasing due to low weight, higher conductivity, non-magnetic property and resistance to corrosion so it is required for student to understand physical metallurgy of nonferrous metals and alloys for specific application. This course emphasize on different nonferrous metals and alloy phase diagram, their heat treatment to modify their properties and applications and to choose or design heat treatment for given metal and alloy.

## 2. Contents

| | | **Allotted hours** |
|---|---|---|
| **Unit1** | **Introduction**<br>Introduction to non-ferrous metals & their alloys: Aluminum Alloys, Copper Alloys, Nickel Alloys, Magnesium Alloys, Titanium Alloys, Lead Alloys, Zinc Alloys, Tin alloys, Babbitts (Antifriction Alloys). | 8 hours |
| | | |
| **Unit2** | **Aluminum and its alloys:**<br>Classification of Aluminum Alloys, Grades of Aluminum alloys, Non-heat treatable Wrought Aluminum Alloys, Heat treatable Wrought Aluminum Alloys, Cast Aluminum Alloys with their Phase Diagrams, Compositions, heat treatments, properties and applications. Heat treatment of Aluminum alloys, titanium alloys and copper alloys, Concept of age-hardening.<br>**Copper and its alloys:**<br>Copper, Brass and Bronze Phase Diagrams, Compositions, heat treatments, properties and applications, Grades of Copper alloys. | 10 hours |

| | | |
|---|---|---|
| **Unit3** | **Nickel and its alloys:**<br>Ni-Cr alloys, Ni-Al alloys, Ni-Cr-Al alloys, Ni-Cr-Al-Ti alloys, Complex Nickel- base alloys Phase diagram with compositions, Heat treatments, properties and applications, Grades of Ni alloys.<br>**Magnesium and its alloys:**<br>Classification of Magnesium Alloys, Wrought Magnesium Alloys, Cast Magnesium Alloys with their Phase Diagrams, Compositions, heat treatments, properties and applications.<br>**Titanium and its alloys:**<br>Compositions, heat treatments, properties and applications. | 10 hours |
| | | |
| **Unit4** | **Lead , Zinc and Tin and their alloys:**<br>Lead and Its alloys Phase Diagrams, Compositions, heat treatments, properties and applications., Zinc and its alloys Phase Diagrams, Compositions, heat treatments, properties and applications., tin and its alloys Phase Diagrams, Compositions, heat treatments, properties and applications.<br>**Babbitts (Antifriction alloys):**<br>Phase Diagrams, Compositions, heat treatments, properties and applications. | 10 hours |

**3. Physical Metallurgy of Non-Ferrous Alloys Lab (List of Experiments)**

| Experiment No | Title |
|---|---|
| **1** | Specimen preparation for non-ferrous metallography |
| **2** | Study and preparation of etching agents for non-ferrous alloys |
| **3** | Microstructure observation of Pure non-ferrous metals |
| **4** | Application of Lever Rule for Phase, Phase Composition & Phase Fraction (Binary Alloys) |
| **5** | Microstructural observation of Aluminum Alloys |
| **6** | Microstructural observation of Copper Alloys |
| **7** | Microstructural observation of Brass |
| **8** | Microstructural observation of Bronze |
| **9** | Microstructural observation of Lead Alloys |

| | |
|---|---|
| **10** | Microstructural observation of Zinc Alloys |
| **11** | Aging Treatment of Al-Cu Alloy |
| **12** | Eutectic, Hypo- And Hyper-Eutectic Alloys: Al-Si (Unmodified), Al-Si (Modified), Pb-6wt%Sb, Pb- 11.1 Wt%Sb And Pb- 20 Wt%Sb |
| **13** | Peritectic And Monotectic Alloys: 60:40 ( + ) Brass, 70:30 ( ) Brass, Cu-10wt%Sn, Cu- 36wt% Pb, Cu- 50 Wt% Pb* |
| **14** | Grain size measurement |
| **15** | Understanding SAE, AISI, UNS and Indian Standards for non-ferrous alloys. |

## 4. Text books

1) Engineering Physical Metallurgy by Lakhtin, CBS Publisher
2) Physical Metallurgy for Engineers – Donald S. Clark, & Wilbur R. Varney, CBS Publishers & Distributors, New Delhi
3) Heat Treatment, Structure and Properties of Non-ferrous Alloys – Charlie R. Books, 1982, ASM.
4) Introduction to Physical Metallurgy – Sidney H. Avner, McGraw-Hill Book Company, New Delhi
5) Heat Treatment Principle and techniques – T V Rajan, C P Sharma, Ashok Sharma , Second Edition, PHI Publications.

## 7. Question paper pattern for end sem exam

As per Appendix A

| Subject: **Introduction to Process Metallurgy** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | Subject Code: MT0402 | | | | Semester: **IV** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 3 | 2 | 0 | 4 | 60 | 0 | 40 | 0 | 100 |

## 1.Course Outcomes

**After completion of this course students will be able to gain knowledge about following**

- Students will able to gain knowledge about the basic mechanism affecting the different extraction techniques such as Pyrometallurgical, Hydrometallurgical & Electro metallurgical extraction processes.
- The students will aware about the requirement of various devices required for carrying out different extraction processes.
- They will able to analyze various factors affecting these extraction processes.
- Students will gain knowledge about the concept of reaction kinetics & its role in understanding the extraction processes.

## 2. Contents

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | Basics of Pyrometallurgical Processes, Drying, Calcination, Agglomeration, Sintering, Roasting, Smelting. Converting, Refining processes with examples for metals like Aluminum, Copper, Zinc, and Lead. | 8 hours |
| | | |
| **Unit 2** | Basics of Hydrometallurgical processes, Fundamentals of Unit processes and Unit operations, Principles and types of Leaching, Kinetics of leaching, and Refining of leached solution, Solvent extraction and ion-exchange processes, Cementation, Gaseous reduction of metals. | 10 hours |
| | | |
| **Unit 3** | Basics of Electrometallurgical processes: Electrowinning and Electrorefining, Aqueous/Fused salt electrolysis. Flow-sheets of | 10 hours |

| | | |
|---|---|---|
| | Extraction of Important Metals, Simplified Flowsheets for the production of Iron, Steel, Aluminum, Copper, Zinc and Lead. | |
| | | |
| **Unit 4** | Reaction kinetics, kinetics of metallurgical processes and material, velocity/rate of reaction, factors affecting rate of reaction, Order of Reaction and molecularity, zero, first, second order and order of reaction, Pseudo-unimolecular reaction, half life period, determination of order of reaction, integration method, half period method, graphical method, Ostwald's isolation method, rate constants, Arrhenius equation, collision theory, Activation Energy, activation energy profile of an exothermic reaction, activation energy barrier, theory of absolute reaction rate. | 10 hours |

## 3. Text Book

1) Principles of extractive metallurgy, H.S. Ray, A. Ghosh (2007).
2) Extraction of nonferrous metals, H.S. Ray, R. Sridhar and K.P. Abraham Affiliated East West Press Pvt Ltd., New Delhi (2007).
3) Metallurgical Thermodynamics Kinetics & Numericals by Dr. S.K.Dutta, (2011), S. Chand Publication.

## 6. Question Paper Pattern for End Sem Exam:

As per Appendix A

| Subject: **Transport Phenomena** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | | Subject Code: MT0403 | | | Semester**: IV** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 3 | 2 | 2 | 5 | 60 | 60 | 40 | 40 | 200 |

**Course Outcomes**

**After completion of this course students will be able to gain knowledge about following**

- To provide knowledge about the basic concept of heat transfer and its different modes.
- To analyze different modes of heat transfer with examples in day to day life.
- To demonstrate the application of various factors & mathematical equations governing the heat transfer in the system.
- To solve different numerical pertaining to all three modes of heat transfer for different systems.
- To demonstrate the phenomena of conduction, convection & Radiation by conducting laboratory scale experiments.
- To make the students understand the concept of fluid behavior & its relevance for different modes of mass transfer.
- To analyze the mass & momentum balance equations to understand the diffusion phenomenon in metallurgical systems.

**2. Contents**

| | | **Allotted hours** |
|---|---|---|
| **Unit1** | Fluid flow and its relevance to mass transfer. General mass transport equation. Modes of mass transfer. Film and boundary layer theories. Diffusion, Generalized diffusion equation. Diffusivity in gases, liquids and solids. Steady, diffusion. Pseudo-steady diffusion. Diffusion through porous solids. Convective mass transfer- Mass transfer in fluid at solid-fluid interface. Mass transfer between two fluids. Mass transfer v/s chemical control, enhancement of process rates. Applications in metallurgical system | 8 hours |

| | | |
|---|---|---|
| | | |
| | | |
| **Unit2** | Definition and classification of fluids. Viscosity, Newtonian and non- Newtonian fluids. Viscous and non-viscous fluids. General features of fluid flow. Laminar and turbulent flow, Newton's law of viscosity, Pascal's law | 8 hours |
| | | |
| **Unit3** | Differential mass balance (continuity equation). Differential momentum balance (equation of motion). Navier Stokes Equation. Application of Differential Balance Equation. Overall mass balance and momentum balance. Euler's equation and its integration to obtain Bernoulli's equation. Bernoulli's Equation, Applications of Bernoulli's Equation, Flow through porous media. | 12 hours |
| | | |
| **Unit4** | Modes of heat transfer. Conduction of heat through solid. Steady and unsteady state. Fourier law of heat conduction. General equation of heat conduction in Cartesian co-ordinate, spherical and cylindrical systems.<br>Convective heat transfer. Free and forced convection. Application dimensional analysis of effective boundary layer.<br>Aspects of Radiative Heat Transfer. Reflection, absorption and transmission of radiation. Black body radiation. Planck's Law. Wein's distribution Law. Heat transfer between two bodies by radiation. Lambert's Law. | 10 hours |

**3. Transport Phenomena Lab (List of Experiments)**

| Experiment No | Title |
|---|---|
| **1** | To study about various fluid properties and fluid flows. |
| **2** | To determine Reynold's number for fluid flow |
| **3** | Measurement of pressure difference using manometers |
| **4** | To verify Bernoulli's theorem. |
| **5** | To apply Bernoulli's equation to Venturimeter |
| **6** | To apply Bernoulli's equation to Orificemeter |

| | |
|---|---|
| **7** | To study the fundamentals of heat transfer |
| **8** | To determine thermal conductivity of insulating powder using sphere in sphere method. |
| **9** | To measure overall heat transfer coefficient for given composite wall with help of composite wall apparatus. |
| **10** | To determine temperature distribution and the effectiveness of fin. |
| **11** | To determine the surface heat transfer coefficient for a vertical tube losing heat by natural convection. |
| **12** | To determine convective heat transfer coefficient in force convection |
| **13** | To determine Stefan-Boltzmann constant |
| **14** | To determine emissivity for the given surface |
| **15** | Study of mass transfer |

**4. Text Books**

1) Rate Processes in Metallurgy -A. K. Mohanty (2009)

## 1. Course Outcomes

**After completion of this course students will be able to gain knowledge about following**

- Student can get the knowledge about the basic concept of system, properties of system and thermodynamics
- Students can analyze and understand all the laws of thermodynamics.
- They can demonstrate the application of various factors & mathematical equations governing the thermodynamics in the system
- They will able to solve different numerical pertaining to all three laws of thermodynamics for different systems
- They can demonstrate the phenomena of Ellingham diagram and its importance pertaining to metal oxides.
- They can understand thermodynamics of solutions ideal & non ideal solution
- They can describe basis of phase rule & its application and various equilibrium using thermodynamics and correlation for binary alloy systems.

## 2. Contents

| | | **Allotted hours** |
|---|---|---|
| **Unit1** | Importance of thermodynamics, Definition of thermodynamic terms, Concept of system, states and equilibrium, Types of system, Extensive and intensive properties, Homogeneous and heterogeneous systems, Quasistatic process, Zeroth law of thermodynamics. First law of thermodynamics, Internal energy, Heat capacity, Specific heat and latent heat, Enthalpy, Isothermal and adiabatic processes. | 8 hours |
| | | |

| | | |
|---|---|---|
| **Unit2** | State properties, Heat of reaction, Heat of formation, Standard heats, Heat of transition, Hess's law, Kirchoff's law equation. Second law of thermodynamics, Entropy of irreversible processes, Auxiliary functions, combined statements of $1^{st}$ and $2^{nd}$ laws, Maxwell's relations,<br>Third law of thermodynamics, Temperature dependence of entropy, Statistical interpretation of entropy, Consequences of third law, Nernst heat theorem | 10 hours |
| | | |
| **Unit3** | Concept of fugacity, activity and mole fraction, Activities in concentrated solution, Activity, Gas phase Reactions ($H_2O$- $H_2$ and $CO_2$ –CO mixtures), Activity in industrial liquid metallic solution, Equilibrium constant, Gibb's-Helmholtz equation. Van't-Hoff equation, Clausius – Clapeyron equation, Reactions involving solid and gases, Thermodynamics of solutions, Ideal solution, Raoult's law, Henry's law, Non-ideal solution Gibb's-Duhem equation, Partial molar properties of mixing, | 10 hours |
| | | |
| **Unit4** | Excess functions, Concept of 1 wt% standard state and Interaction coefficient, Regular solutions, Sievert's law-residual gases in steel, Phase relations and phase rule-its applications, Free energy-composition and temperature-composition diagrams for binary alloy systems and their correlation, determination of liquidus, solidus and solvus lines, Effect of pressure on phase transformation and phase equilibrium, Ellingham diagram in detail for metal oxides. | 10 hours |

## 3. Text Books

1) Introduction to Metallurgical Thermodynamics, R. H. Tupkary, T. U. Publishers, (1995).
2) Introduction to Materials and Metallurgical Thermodynamics, A. Ghosh, PHI, (2009).
3) Metallurgical Thermodynamics Kinetics & Numericals by Dr. S.K.Dutta, (2011), S. Chand Publications.

## 4. Reference Books

1) Problems in Metallurgical Thermodynamics and Kinetics, G. S. Upadhyaya and R. K. Dube, Pergamon Press , (1977).
2) Physical Chemistry of Metals, L. S. Darken and R. W. Gurry, McGraw Hill (1953).

## 6. Question Paper Pattern for End Sem Exam

As per Appendix A

| Subject: **Energy Economy & Waste Management** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | | Subject Code: MT0405 | | | Semester: **IV** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 3 | 0 | 0 | 3 | 60 | 0 | 40 | 0 | 100 |

**1. Course outcome:**

On completion of the course students will be able to:

- Understand economic and ability to apply economic and financial evaluation of energy projects.
- Learning the basics of cost calculation for electricity and heat production from CHP and power plants
- Design processes for the treatment of waste water and the sludges that arise from them;
- Discuss the operational aspects of handling hazardous wastes; and
- Describe methods for the recycling and minimization of solid wastes.

**2. Contents**

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | **Introduction** Energy basics; Energy defined, Alternative classifications of Energy, India and world energy consumption and trade. Energy and multidimensional interactions, Introduction to energy system, Energy balance, Analysis of energy balance information, Energy demand, Management of Energy Demand, Economy of energy supply. | 8 hours |
| | | |
| **Unit 2** | **Fossil Fuel Markets** Coal, oil, natural gas.<br>Economics of Non-Renewable resource supply.<br>**Financing Energy Development** Energy resources and economic rent (economic rent, leasing and taxation of energy resources, government revenues), Allocation of resources over time and financing energy development (discounting, "levelized" costs of renewable resources, Cost Benefit Analysis, Laffer Curve, Interrelationship between energy system and LCOE, depletion of non-renewable resources), GDP, GNP, Energy futures. | 10 hours |

| | | |
|---|---|---|
| | | |
| **Unit 3** | **Solid Waste Management & Disposal**<br>Introduction to solid waste management, the disposal decades, the nature of the problem, Methods of waste disposal (Treatment/disposal Technologies): dumping, sanitary landfills mechanical-biological treatment, incineration, anaerobic digestion, composting; recycling of plastics, batteries. | 10 hours |
| | | |
| **Unit 4** | **Liquid Waste Management** Introduction to liquid waste management, types and sources of liquid waste, Management of liquid waste: Human waste management, sullage management, Industrial waste management, Collection, storage, and treatment of liquid waste: septic tanks, anaerobic biogas reactor, and Centralized wastewater treatment systems. | 10 hours |

**3. Text Books:**

1) Energy Economics: Concepts, Issues, Markets and Governance by Subhes C. Bhattacharyya, 2011.
2) Energy Economics: A Modern Introduction by Ferdinand E. Banks, 2003.
3) Waste Management and Resource Recovery By Charles R. Rhyner, Leander J. Schwartz, Robert B. Wenger, Mary G. Kohrell, 2000.

**4. Reference Books:**

1) Environmental science by Eldon Enger, Bradley Smith. McGraw Hill, 2000.
2) Solid/liquid separation: waste management and productivity enhancement: by H. S. Muralidhara, 1989.
3) International Handbook on the Economics of Energy edited by Lester C. Hunt, Joanne Evans, 2009 Edition.
4) Energy Economics: Growth, Resources, and Policies by Richard John Eden, 1982.

**6. Question Paper for end semester Examination:**

As per Appendix A

| Subject: **Cyber Security and Intellectual Property Rights** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | Subject Code: CE0407 | | | Semester: **IV** | | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 01 | 00 | 00 | 00 | 60 | 00 | 40 | 00 | 100 |

**Learning Objectives**

1. To facilitate understand & critical understanding about Cybercrimes, Ethical Hacking, cyber security, forensics and cyber laws
2. Exploration of the legal and policy developments in various countries for cyber space
3. To provide in-depth knowledge of Information Technology Act, 2000 including Information Technology Amendment Act, 2008
4. Understanding e-Governance, Electronic Contracts, e-Banking & Secure electronic records

**UNIT-I** **[3 hours]**

**Introduction:**

Information Security Overview, Cyber security, Cyber security objectives and policies, Differences between Information Security & Cyber security, Cyber security Principles, Introduction of Cyber crime, Classifications of Cybercrimes.

**UNIT-II** **[3 hours]**

**Security Threats and vulnerabilities:**

Overview of Security threats, Hacking Techniques, Password Cracking, Insecure Network connections, Malicious Code, Programming Bugs, Cyber crime and Cyber terrorism, Information Warfare and Surveillance. Applicationsecurity(Database,E-mailandInternet).

**UNIT-III** **[3 hours]**

**Overview of Security Management:**

Overview of Security Management , Security Policy , Security Procedures and Guidelines , Risk Management , Security Laws**, System Security** (Desktop, email,web), Intrusion Detection Systems, SecurityTechnology-FirewallandVPNs ,Backup SecurityMeasures.

**UNIT-IV** **[3 hours]**

**Cyber law- Intellectual property right:**

Introduction, Objectives of Intellectual property law, Types of IPR, Advantages of IPR, IPR in India, Offences and Penalties.

## Text Books

1. "Cyber Security Understanding Cyber Crimes, Computer Forensics and Legal Perspectives", Nina Godbole, SunitBelapur, Wiley India Publications, April, 2011

## Reference Books

1. CharlesP.Pfleeger,ShariLawerancePfleeger,"AnalysingComputerSecurity", PearsonEducationIndia.

| 4 | 0 | 2 | 5 | 60 | 60 | 40 | 40 | 200 |

## 1. COURSE OUTCOMES :

- To make the students aware about the basic information processes.
- To impart the knowledge about the Different heat treatment processes and different
- The central point of this course is to provide a physical basis that links the structure of materials with their properties, focusing primarily on metals. With this understanding in hand, the concepts of alloy design and microstructural engineering are also discussed.

## 2. Course Content:

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | **Principles of heat treatment of steels:**<br>Phase Transformation on heating, Forming of austenite, Kinetics of formation of austenite, Nucleation sites in eutectoid steels, Austenitic grain size, Grain growth, Determination of austenitic grain size, Importance of austenitic grain size<br>**TTT (Time Temperature Transformation) and CCT (Continuous Cooling Transformation) diagrams:**<br>Method of plotting, Types of TTT diagram, Critical cooling rate, Effect of alloying elements on TTT diagram, Applications, Continuous cooling transformation diagram, Limitations of Iron-Iron Carbide Diagram, Effect of Alloying elements on CCT diagram. | 8 hours |
| | | |
| **Unit 2** | **Pearlitic transformation:** Mechanism of transformation, Kinetics of transformation, Hull-Mehl model of pearlitic transformation, Effect of alloying elements on transformation, Interlameller spacing,<br>**Bainitic transformation:** Characteristics, Mechanism of transformation, Bainitic structure.<br>**Martensitic transformation:** | 10 hours |

| | | |
|---|---|---|
| | Diffusionless transformation, Mechanism of transformation, Kinetics of transformation, $M_s$ - $M_f$ temperatures, Athermal and isothermal martensites, Effect of applied stress on transformation, Habit planes, Bain distortion model / crystallographic theory of martensitic transformation, Tempered Martensite, Retained austenite, Martensitic transformation in non-ferrous systems such as Fe-Ni and Cu-Al systems. | |
| | | |
| **Unit 3** | **Heat treatment processes:**<br>Stress relieving, Annealing – full annealing, partial annealing, bright annealing, diffusion annealing, recrystallization annealing, Spheroidizing, Normalizing, Hardening and Tempering, Hardening of typical steels, cast irons and non-ferrous alloys.<br>**Surface hardening of metals:**<br>Principles involved in induction and flame hardening methods and application of selective hardening, Laser hardening, Case carburizing (solid, liquid and gaseous), Cyaniding, Carbonitriding, Nitriding, Plasma nitriding etc., Depth of penetration - its measurement and relation with time and temperature, Hardening & Hardenability of steels. | 10 hours |
| | | |
| **Unit 4** | **Special methods of heat treatment:**<br>Austempering, Martempering, Ausforming, Patenting, Sub-zero treatment etc., Thermo Mechanical treatments. Heat treatment of carbon steels, alloy steels, tools and dies steels, stainless steels (with reference to carbide precipitation and sigma phase formation) and cast irons – specific examples, Heat treatment of Aluminum alloys, titanium alloys and copper alloys, Concept of age-hardening. Design for heat treatment, Heat treatment furnaces- their temperature and atmosphere control, Defects in heat treated parts, Causes for the defects in heat-treated parts and remedies. | 10 hours |

**3. Heat Treatment of Alloys Lab (List of Experiments)**

| Experiment No | Title |
|---|---|
| **1** | Annealing of Medium / High carbon steels |
| **2** | Characterization of annealed steel |
| **3** | Normalizing of Medium / High carbon steels |
| **4** | Characterization of normalized steel |
| **5** | Spheroidizing of High carbon steel |
| **6** | Characterization of spheroidized steel |
| **7** | Hardening of medium/ high carbon steels |
| **8** | Characterization of hardened steel |
| **9** | Tempering of medium/ high carbon steels |
| **10** | Characterization of tempered steel |
| **11** | To examine the effect of quenching media on hardening of steel |
| **12** | To measure the hardenability of steel using Jominy End-Quench test |
| **13** | To study the case hardening processes |
| **14** | Carburizing of low carbon steels |
| **15** | Case depth measurement and characterization of carburized steels |

**3. Text Book:**

1) Heat Treatment (Principles and Techniques) by T. V. Rajan, C. P. Sharma and A. Sharma, PHI
2) Physical Metallurgy for Engineers by D. S. Clark and W. R. Varney, East-West

**4. Reference Books**

1) Introduction to Physical Metallurgy by S. H. Avner, Tata Mc-Graw Hill
2) Engineering Physical Metallurgy and Heat Treatment by Yu. M. Lakhtin, MIR Publishers
3) Material Science and Metallurgy for Engineers by V D Kodgire and S V Kodgire, Everest Publishing House
4) Heat Treatment of Metals by Vijendra Singh
5) Physical Metallurgy (Principles and Practice) by V. Raghvan, PHI
6) Heat Treatment of Metals by Zakharov
7) ASM Handbook on Heat Treating, Vol. 4
8) Handbook of Heat Treatment by K. H. Prabhudev, Tata Mc-Graw Hill

## 5. Digital Learning Resources

http://nptel.ac.in/courses/113105024/

## 6. Question Paper Pattern for End Sem Exam

As per Appendix A

| Subject: **Iron Making** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | Subject Code: MT0502 | | | | Semester: **V** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 4 | 0 | 2 | 5 | 60 | 60 | 40 | 40 | 200 |

## 1. Course Outcomes:

- Know the overall idea of how Irons are produced ,about the history of Iron making and availability of raw materials for iron production various techniques of raw material preparation for charging in iron making furnace, construction and operation of iron making furnace and reactions occurring in the furnace , reaction mechanism inside the blast furnace.
- The 'Metallurgist' will be able to acquire M Tech /ME / MSc(engg) & PhD degrees in order to enhance , sustain and nurture his/her professional career by : Joining any national institutes like IIT, NIT, IISc in various specialized fields of metallurgical & materials engineering such as Industrial metallurgy, Steel technology.
- For a 'Metallurgist', there are a lot of job opportunities with tremendous growth in almost all types of industrial sectors in the present scenario. These jobs include different functions such as Managerial role, Material Scientist, Techno-commercial Manager, Quality control &assurance, Marketing &Sales, Project &Planning.
- Services such as ONGC, IOCL, SAIL, GAIL, ESSAR, ISPAT,laboratories of national and inter-national repute such as NASA,BARC, BARC, CSIR, NML, DRDO, DMRL, IPR, etc.
- There is plenty of scope and feasibility for a 'Metallurgist' to go for self employment by setting up an 'Enterprise/ Industrial Unit in Setup a small foundry of ferrous and non-ferrous metals.

## 2. Contents

| | | **Allotted hours** |
|---|---|---|
| **Unit1** | General: History of iron making. Occurrence, distribution and evaluation of raw materials (iron ore, coal and flux) for iron making. Burden materials and burden preparation: Burden preparation, Burden qualities. Agglomeration- Sintering-process, variables and | 8 hours |

| | | |
|---|---|---|
| | machines. Pelletization process, Theory of bonding. Mechanism of ball formation, Disc and drum pelletizer, Induration of pellets, cold bonding technique and testing of pellets. | |
| | | |
| **Unit2** | Blast Furnace (B.F.) Constructional features: Profile, Refractories, Accessories, Charging mechanism, Bell and bell-less charging systems. B.F. – Reactions: Physico-chemical principles of blast furnace. Blast furnace reactions. Reaction in stack, tuyere zone, bosh and hearth. Thermodynamics equilibria, Direct and indirect reduction. Kinetics of iron-oxide reduction, Slag-metal reactions, Desiliconization, Desulphurization. | 10 hours |
| | | |
| **Unit3** | B.F. – Operations: Operational steps, Blast furnace irregularities and remedial measures, Blast furnace gas, properties, cleaning and utilization. | 10 hours |
| | | |
| **Unit4** | Alternative Methods of Iron Making: Reduction smelting, Direct reduction processes, Fluidized bed process, Electro thermal process and mini blast furnace. | 10 hours |

**3. Iron Making Lab (List of Experiments)**

| Experiment No | Title |
|---|---|
| **1** | Identification of raw material for iron making |
| **2** | Bulk density Measurement |
| **3** | Determination of Angle of Repose |
| **4** | Sintering of iron ore fines |
| **5** | Pelletization of iron ore fines |
| **6** | Induration behavior of pellets |
| **7** | Box compression test of hardened or indurated pellets |
| **8** | Tumbling/Drum test of green and indurated pellets |
| **9** | Shatter Test of agglomerated products |
| **10** | Drop Test of agglomerated products |
| **11** | Study of ISP layout |
| **12** | Charge calculations for raw materials in Blast Furnace |

| | |
|---|---|
| **13** | Study of different parts of Blast Furnace |
| **14** | Chemical analysis of Iron based products |
| **15** | Study of Briquetting Process |

**4. Text Book(s)**

1) Introduction to Modern Iron Making, R. H. Tupkary, (Khanna Pub.)
2) Iron Making and Steel Making: Theory and Practice, A. Ghosh and A. Chatterjee, (Prentice Hall)
3) Principles of Blast Furnace Iron Making, A. K. Biswas, (SBA Pub.)

**5. Reference Books**

1) Making, Shaping and Treating of Steels, A. W. Cramb (Editor) (11th Edition, Vol. 1 & 2, AISE, Pittsburg)
2) Blast Furnace: Theory and Practice,J. G. Peacey and W. G. Davenport, (Pergamon Press, Oxford)
3) Blast Furnace Iron Making, J. J. Gupta and Amit Chatterjee, (SBA Pub.)

**6. Digital Learning Resources**

www.steeluniversity.org.in
http://nptel.ac.in/

**7. Question Paper Pattern for End Sem Exam:**

As per Appendix A

| Subject: **Foundry Technology** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | Subject Code: MT0503 | | | | Semester: **V** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 4 | 0 | 2 | 5 | 60 | 60 | 40 | 40 | 200 |

1. **Course Outcomes** :

- Knowledge about the fundamentals of the casting, basic terminology related to casting process.
- Students will be aware about the alternative method for the manufacturing of component for engineering applications.
- Get knowledge about how to manufacture the intricate casting what should be the process parameter, design of pattern, mould, etc.
- Students will be aware about the melting practice of different cast alloy
- Get knowledge to overcome defects generated during casting

2. **Contents**

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | **General:** Introduction to metal casting and foundry industry in modern industrial scenario. Advantages and limitations of casting methods. Classification of foundries. Different sections in a foundry and their functions. Important cast metals and alloys-their composition, properties and uses.<br>**Patternmaking:** Patterns. Types. Pattern making materials and their selection, Color code, Pattern allowances, Core-boxes and their types. | 8 hours |
| | | |
| **Unit 2** | **Moulding and Core-making Materials:** Ingredients of common type of moulding and core-making sands, their properties and behavior, testing of sands and clay.<br>**Moulding Processes:** Classification, Brief description of processes such as green sand, dry sand, loam, floor, Pit and machine molding. No-bake molding process. CO2-Silicate process | 10 hours |
| | | |

| | | |
|---|---|---|
| **Unit 3** | **Casting Processes:** Shell molding and casting process, Investment casting process, Permanent molding process. Gravity and Pressure Die-casting, Centrifugal casting process. Low Pressure Die-casting (LDPC) process.<br>**Melting:** Melting of cast iron, Constructional features of Cupola, Principles and operation of Cupola furnace. Advances in cupola melting operation, Melting of aluminum and Copper-based alloys. Furnaces used, Melt-treatments such as degassing, Grain refining and modification. | 10 hours |
| | | |
| **Unit 4** | **Gating System:** Elements of gating system. Classification. Gating design considerations, Gating ratio. Gating practice for ferrous and non-ferrous alloys, Pouring equipments.<br>**Risering System:** Risering practice, Functions of riser, Directional and progressive solidification. Centerline feeding resistance. Riser efficiency. Riser design considerations. Risering curves. Cain's, N.R.L. and Modulus methods, Feeding distance and feeding aids, Blind and atmospheric risers<br>**Quality Control in Foundry:** Casting defects, their causes and remedies. Shop floor quality control tests such as composition control, Wedge test, fluidity, temperature measurement etc. | |

**3. Foundry Technology Lab (List of Experiments)**

| Experiment No | Title |
|---|---|
| **1** | Introduction to foundry laboratory. |
| **2** | To detrmine AFS fineness number and distribution coefficient of agiven sand sample |
| **3** | To demonstrate the working of sand muller |
| **4** | To determine the clay content of given sand sample |
| **5** | To prepare standard samples under identical condition for checking important physical properties of foundry sand |
| **6** | To determine compression strength of foundry sand |
| **7** | To determine permeability number of green sand,core sand and raw sand |
| **8** | To find out the green mould hardness of the sand mould |
| **9** | To determine shatter index of the sand sample. |
| **10** | To determine moisture content of the prepared sand |

| | |
|---|---|
| **11** | To prepare core sand |
| **12** | To findout the hardness of dried cores made out of core sands |
| **13** | To perform peelback test on core sand |
| **14** | To perform hot distortion and tensile tests on core sand |
| **15** | To study the aluminum melting and casting |

1. **Text Book(s)**

    1) Principles of Metal Casting, R. W. Heine, C. R. Loper and P. C. Rosenthal, (Tata McGraw Hill)
    2) Principles of Foundry Technology, P. L. Jain, (Tata McGraw Hill).

**4. Reference Books**

1) Fundamentals of Metal Casting Technology, P. C. Mukherjee, (Oxford & IBH)
2) Foundry Technology, P. R. Beeley
3) Foundry Engineering, H. F. Taylor, M. C. Flemings,(Wiley Eastern)
4) Foundry Technology, D. Kumar & S. K. Jain, (CBS Pub.)

**5. Digital Learning Resources**

**http://nptel.ac.in/**

**6. Question Paper Pattern for End Sem Exam** :

As per Appendix A

| Subject: **Non Ferrous Extractive Metallurgy** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | | Subject Code: MT0504 | | | Semester: **V** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 3 | 2 | 0 | 4 | 60 | 0 | 40 | 0 | 100 |

## 1. Course Outcomes

- To make the students aware about basics of Non Ferrous metals and its extraction processes
- To impart the knowledge about the basic steps followed in Extraction and its importance After extraction of pure metal from their respective ores
- To develop the knowledge regarding the auxiliary operation and the advancement in various extractive process.

## 2. Contents

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | **General:**<br>World resources of Non-ferrous metals and their occurrence. Present and future position of non-ferrous metallurgical industry in India-resources, production and consumption.<br>Indian scenario of non-ferrous ores and mineral deposits. Production plants for non-ferrous metals such as copper, zinc, lead, tin, Aluminum, nickel, magnesium, titanium, etc.<br>Basics of Pyrometallurgy, Hydrometallurgy and electrometallurgy | 8 hours |
| | | |

| | | |
|---|---|---|
| **Unit 2** | **Aluminum:**<br>Occurrence of Bauxite. Bayer's process for production of alumina. Alternatives to Bayer's process. Hall-Heroult process-conventional and new materials for construction of Aluminum reduction cell, nature of electrolyte. Electrolysis of alumina with emphasis on physico-chemical principles and secondary-reactions, factors affecting current efficiency. Alternatives to Hall-Heroult process. Refining of Aluminum.<br><br>**Copper:**<br>Occurrence of copper ores. Roasting. Matte-smelting, Converting and Refining process as applied to copper production and their physico-chemical aspects. Single step and multistep continuous processes. Hydrometallurgical process for production of primary copper. Recovery of copper from copper slag. | 10 hours |
| | | |
| **Unit 3** | **Nickel:**<br>Occurrence of nickel ores, Pyrometallurgical and Hydrometallurgical processes for nickel production and refining.<br>**Lead and Zinc**:<br>Occurrence of lead and zinc ores, Pyrometallurgical and Hydrometallurgical processes for lead and zinc production and their physio-chemical aspects, Refining of lead and zinc, Recovery of byproducts.<br>**Tin:**<br>Occurrence of tin, various methods of extraction of tin from its ores and other sources. Uses of tin. | 10 hours |
| | | |
| **Unit 4** | **Gold and Silver:**<br>Occurrence of gold and silver. Various methods for production of gold and silver from their ores and other sources.<br>Recovery of gold, silver and platinum from secondary sources such as Copper Anode Mud, Red Mud, Zinc dross and electrolytic solutions.<br><br>**Magnesium:**<br>Occurrence of magnesium, Methods of production of magnesium oxide and magnesium chloride, Pyrometallurgical extraction of magnesium, Electrolytic extraction and refining of magnesium.<br>**Titanium** | 10 hours |

| | | |
|---|---|---|
| | Occurrence of titanium, Extraction, Production, recovery, properties and application. | |

## 3. Text Book(s)

1) Extraction of nonferrous metals, H.S. Ray, R. Sridhar and K.P. Abraham Affiliated East West Press Pvt Ltd., New Delhi (2007).

## 6. QUESTION Paper Pattern for End Sem Exam:

As per Appendix A

| Subject: **Plastic Deformation of Metal** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | | Subject Code: MT0505 | | | Semester: **V** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 3 | 2 | 0 | 4 | 60 | 0 | 40 | 0 | 100 |

## 1. Course Outcomes

After completion of this course students will be able to gain knowledge about following

- To provide knowledge about the basic concept crystals their structures and their defects that is point , line, volume and surface defects
- To teach them basics about dislocations and how dislocations help in improving properties.
- To teach them various strengthening mechanism of metals.
- To solve different numerical pertaining to resolved shear stress and hall petch equation.
- To help them understand fracture mechanics like ductile and brittle fracture & give them knowledge about fracture mechanics.
- To introduce them about testing and specially creep and fatigue testing in detail.
- To solve practical example on the same testing and demonstrate them.
- To make them understand various heat treatments and their basics.

## 2. Contents

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | Crystal Imperfections, Point Defects, Line Defects & Surface Defects, Dislocation and its types, Slip Phenomena, Slip Systems. Theoretical strength of a perfect Crystal, Slip by dislocation movement concept of critical resolved shear stress, Climb and its types, Twinning as a mode of deformation, Burgers vector and the dislocation loop, Stress fields and energies of dislocations, Jogs and Kinks. | 8 hours |
| | | |

| | | |
|---|---|---|
| **Unit 2** | **Dislocation:**<br>Dislocation in F.C.C (including formation of stacking fault.) B.C.C and H.C.P., Forces. Multiplication of dislocations, Techniques to observe dislocation, Dislocation point defects interactions, Intersection of Dislocations, Dislocations pile up.<br>Deformation of single and polycrystalline materials, Grain boundaries. Low-angle boundaries, High Angle Grain Boundaries Surface tension of the grain boundary, Strengthening from grain boundaries, Hall-petch equation, Yield point phenomenon. | 10 hours |
| | | |
| **Unit 3** | Strain- hardening of polycrystalline metals, Strain hardening of single crystals, Relation between single and polycrystalline stress-strain curve, Solid – Solution hardening. Strengthening due to second phase particles, Strain – ageing behavior, Annealing of cold-worked metals, Recovery, Recrystallization and grain growth.<br>All types of tests, Modes of Failure, Theory of ductile-brittle transition temperature (DBTT). | 10 hours |
| | | |
| **Unit 4** | Types of fracture in metals. Theoretical cohesive strength of metals. Griffith theory of brittle fracture, Elementary concept of fracture mechanics, Fatigue test. Theory of fatigue. Effect of metallurgical variables and temperature. Creep test, Creep curve. Stress-rupture test, Creep mechanisms. High temperature alloys. Effect of some metallurgical variables. Presentation of engineering creep data. | 10 hours |

## 3. Text Books

1) Mechanical Metallurgy – G.E.Dieter, M.C. Graw- Hill (1976).
2) Physical Metallurgy Principles- R.E. Reed-Hill, Divan-Nostrand Company (1964).
3) Deformation and Fracture Mechanics of Engineering Materials – Richard W. Hortzberg, John Wiley & Sons (1996).
4) Structure and Properties of Materials, Vol.III, Mechanical Behaviour, John Wulff, H.W. Hayde, W.I.Moffatt, Wiley Eastern Private Ltd (1988).

## 4. Reference Books

1) Mechanical Behaviour of Materials T. H. Courtney (2005).
2) Testing of Metallic Materials –A. V. K. Suryanarayan (Pub.-PHI, New Delhi), (1976).

**6. Question Paper Pattern for End SemExam:**

As per Appendix A

| Subject: **Surface Engineering** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | | Subject Code: MT0506 | | | Semester: **V** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 4 | 0 | 0 | 4 | 60 | 0 | 40 | 0 | 100 |

## 1. Course Outcomes :

- To understand the concept and basis of surface engineering.
- To understand the various methods of surface modification techniques.
- Understanding of the various modification phenomena.
- From application point of view students can co-relate various techniques with desired properties and applications.
- It will help students to understand various advanced machineries and their working principles like plasma, laser, and ion beam, etc.

## 2. Contents

| | | **Allotted hours** |
|---|---|---|
| **Unit1** | Scope of surface engineering in metals, ceramics, polymers and composites, Surface Preparation methods such as Chemical, Electrochemical, Mechanical- Sand Blasting, Shot peening, Shot blasting, Hydroblasting, Vapor Phase Degreasing etc., Properties of Various Coating, Coating Methods. | 8 hours |
| | | |
| **Unit2** | Chromating, Phosphating, Anodizing, Thermochemical processes, industrial practice, economy and energy considerations. Electrolytic and Electroless plating of important metals and alloys | 10 hours |
| | | |
| **Unit3** | Surface pretreatments, Hot Dipping, galvanizing, testing/evaluation of surface properties.<br>**Coating from Vapour Phase**<br>PVD, CVD, Various Methods used, mechanisms, important reactions involved and applications. | 10 hours |
| | | |
| **Unit4** | Sputtering, Plasma Spray & Ion Implantation Methods, mechanisms & applications. Surface modification by directed energy beams like | 10 hours |

| | | |
|---|---|---|
| | ion, electron and laser beams, novelty of composition and microstructures.<br>**Diffusion Coating:** Various Techniques For Single And Multiple Element Coating, High Temperature Coating- Carburising, Carbonitriding,Silicanizing,Chromizing, Aluminizing, Boronizing, Boronitriding. | |

**3. Text Book(s)**

1) J. R. Davis-Surface Engineering for Corrosion and Wear Resistance.
2) George J. Rudzki -Surface Finishing Systems. metal and non-metal
3) finishing handbook-guide, Metals Park : ASM, 1983
4) James A. Murphy- Surface Preparation and Finishes for Metal, McGraw-Hill, New York 1971

**4. Reference Books**

1) P. G. Sheasby and R. Pinner - Surface treatment and finishing of
2) Aluminum and its alloy,Volume-2, 5th ed., ASM, Metals Park, 1987
3) K. E. Thelning -Steel and its Heat Treatment Bofors Handbook, London Butterworths, 1975
4) Surface Engineering Hand Book, edited by Keith Austin, London
5) Kogan Page, 1998
6) ASM Handbook
7) Rajiv Mishra on Friction Stir Surfacing & Friction stir Processing

**5. Digital Learning Resources:**

**www.nptel.ac.in**

**6. Question Paper Pattern for End Sem Exam:**

As per Appendix A

| Subject: **Technical Communication and Soft Skills** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | Subject Code: SH0507 | | | Semester: **V** | | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 1 | 0 | 0 | 0 | 60 | 00 | 40 | 00 | 100 |

**Course Objectives:**

1. To enable students to interact with a degree of fluency and spontaneity that makes regular interaction with fluent English speakers quite possible without strain for either party.
2. To understand with ease virtually everything heard or read.
3. To express themselves spontaneously, very fluently and precisely, differentiating finer shades of meaning even in the most complex situations.
4. To understand sentences and frequently used expressions related to areas of most immediate relevance (e.g. very basic personal and family information, shopping, local geography, employment).
5. To communicate in simple and routine tasks requiring a simple and direct exchange of information on familiar and routine matters
6. To understand the main ideas of complex text on both concrete and abstract topics, including technical discussions in their field of specialization.

**Course Content:**

| | Sr. No. | Content |
|---|---|---|
| Listening | 1 | Listening: Cloze test |
| | 2 | Listening to Talks (BBC, TED) 1 |
| | 3 | Listening to Talks 2 |
| Speaking | 4 | Phonetics: Sounds & Symbols & Accent Patterns |
| | 5 | Vocabulary Games: Intermediate Level |
| | 6 | Vocabulary Games: Intermediate Level |
| | 7 | Building Dialogues: Situational Conversation |
| | 8 | Role Play |
| | 9 | Group Discussion |

| | | |
|---|---|---|
| Reading | 10 | How to Read effectively |
| | 11 | Reading to Remember : SQ3R |

| | | |
|---|---|---|
| Writing | 12 | Grammar Intermediate: Sentence Transformation |
| | 13 | Common Errors in English |
| | 14 | Précis Writing |
| | 15 | Effective Paragraph Writing |

# 6TH SEMESTER

Approved Vide Agenda Item No. 03 of Minutes of Meeting of Academic Council held on 11 July 17

## 1. Course Outcomes:

- Know the overall idea of how steels are produced ,about the history of steel making and availability of raw materials for iron production various techniques of raw materials preparation for charging in steel making furnace, construction and operation of steel making furnace and reactions occurring in the furnace , reaction mechanism inside the blast furnace .
- The 'Metallurgist' will be able to acquire M Tech /ME / MSc(engg) & PhD degrees in order to enhance , sustain and nurture his/her professional career by :
- Joining any national institutes like IIT, NIT, IISc in various specialized fields of metallurgical & materials engineering such as Industrial metallurgy, Steel technology.
- For a 'Metallurgist', there are a lot of job opportunities with tremendous growth in almost all types of industrial sectors in the present scenario. These jobs include different functions such as Managerial role, Material Scientist, Techno-commercial Manager, Quality control &assurance, Marketing &Sales, Project &Planning.
- Services such as ONGC, IOCL, SAIL, GAIL, ESSAR, ISPAT, laboratories of national and inter-national repute such as NASA,BARC, BARC, CSIR, NML, DRDO, DMRL, IPR, etc.
- There is plenty of scope and feasibility for a 'Metallurgist' to go for self employment by setting up an 'Enterprise/ Industrial Unit in Setup a small foundry of ferrous and non-ferrous metals.

## 2. Contents

| | | **Allotted hours** |
|---|---|---|
| **Unit1** | General: Old Steel Making practices. Modern equipment and practices. Integrated Steel Plants in India. Mini steel plants their advantages and limitations – present scenario. | 8 hours |

| | | |
|---|---|---|
| | Physical Chemistry of Steel Making: Thermodynamic and Kinetics of Refining Reactions, Carbon, Phosphorus, Sulphur and Silicon Reactions. Refining Slag and its Properties. Importance and Mechanism of decarburization. Reaction at Slag Metal interface. | |
| | | |
| **Unit2** | Basic Oxygen Steel Making: BOF practice, Equipment, Operation and Process, slag Metal reactions in B.O.F. Raw material and flux practices. Kaldo, OBM, LD-AC, Rotor process, Top and Bottom blowing processes. Oxygen Lance: Design, Construction and Operation. Top and Bottom Blown processes, Its advantages and disadvantages<br>Electric Steel Making: Electric Arc Furnaces: Types and construction. Sequence of operations. Various additions at Different Stages, Slag Control. UHP Arc Furnaces. Arc Furnace practices for Carbon and Low Alloy Steels. Modern developments in ARC furnaces. | 10 hours |
| | | |
| **Unit3** | Quality Steel Making: Introduction, Sources of Inclusions, Sulphur, Phosphorus, and Gases in Steels. Kinetics of Deoxidation of Molten Steel, Application of Ellingham Diagrams, Thermodynamics of Reaction During Degassing of Liquid Steel, Fluid Flow and Mixing in Ladle, Kinetics and Mass Transfer, Ladle Injection Metallurgy, Desulphurization & Dephosphorization.<br>Secondary Steel Making: Metallurgical Principles in Secondary Steel Making and Secondary Steel Making Processes. Ladle Furnaces (L.F.), Vacuum Systems and Vacuum treatment of Steel. Removal of Gases from steel. LF-VD processes and AOD, VOD, VAD techniques, R-H degassers. Ladle Stirring and its Advantages. ESR Principle And Technology. Deoxidation – Theory and practice, Floatation's of deoxidation products, Modifications of Inclusions. Injection Metallurgy | 10 hours |
| | | |
| **Unit4** | Inclusions in Steel: Influence of Inclusions on Mechanical Properties of Steel, Inclusion, Identification and Cleanness Assessment, Origin of Non Metallic Inclusions, Inclusion Control Continuous Casting (C.C.) and Ingot Casting: 6 Hrs Ingot Casting: Types of Moulds, Advantages and Disadvantages. Ingot Defects and Remedies. Continuous casting: C.C. machines with its various units and types. C.C. of Blooms, Slabs and Thin slabs EM S of Moulds. Reoxidation prevention methods during Steel Casting. Advantage of C.C. | 10 hours |

| | | |
|---|---|---|
| | Environmental issues related to Steel Making, Heat Transfer & Solidification Rate in Ingot Casting and Continuous Casting, Distinguishing Metallurgical Aspects of Continuous Casting of Steel. | |

**3. Text Book(s)**

1) An Introduction to Steel Making Tupkary R.H. - Khanna Publishers, Delhi.
2) Manufacture of Iron And Steel Vol I& II Bashforth- Asia Publishing House, Mumbai.

**4. Reference Books**

1) Making, Shaping and Treating of Steels, A. W. Cramb (Editor) (11th Edition, Vol. 1 & 2, AISE, Pittsburg)
2) Introduction to Physical Chemistry of Steel Making: - R.G.Ward, ELBS.
3) Steel Making; Kudrin V. Mir Publisher, Moscow, 1985

**5. Digital Learning Resources**

www.steeluniversity.org.in

**6. Question Paper Pattern for End Sem Exam:**

As per Appendix A

| Subject: **Electrometallurgy & Corrosion** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | Subject Code: MT0602 | | | | Semester**: VI** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 4 | 0 | 2 | 5 | 60 | 60 | 40 | 40 | 200 |

## 1. Course Outcomes:

- Understand the origin of the difference in electrical potential across an interface, in particular, a metal/electrolyte interface.
- Understand the relationship between rates of electrochemical reactions and the potential drop across interfaces.
- Understand the causes of and the mechanisms of various types of corrosion, including uniform corrosion, galvanic corrosion, crevice corrosion, pitting corrosion, intergranular corrosion, and various modes of environmentally assisted cracking.
- Be knowledgeable of the influence of a material's composition and microstructure on its corrosion performance.
- Be knowledgeable of the effect of an electrolyte's composition on the corrosion of metals.
- Be able to identify materials that will exhibit adequate corrosion resistance in a particular environment.
- Be able to propose economically viable remedial actions that will eliminate or reduce corrosion to a tolerable level.

## 2. Contents

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | **Basics of Electrochemistry**<br>Faradays' laws of electrolysis, current efficiency, current density, electrode potentials, Thermodynamics and Kinetics of Electrode Processes- Polarization Curves, Concept of Over-Potential, Kinetics Of Passivity and Transpassivity, Nernst's Equation, Emf Series, Evan's Corrosion Diagram, Galvanic Series. Pourbiax Diagram for Metal Water System,<br>Applications and Limitations. | 8 hours |
| | | |

| | | |
|---|---|---|
| **Unit 2** | **Forms of Corrosion**<br>The relevance of corrosion studies, forms of corrosion, Uniform Corrosion, Galvanic Corrosion, Crevice Corrosion, Pitting Corrosion, Intergranular Corrosion, Selective Leaching, Erosion Corrosion, stress cracking corrosion, Hydrogen Damage<br>**High Temperature Corrosion**<br>High Temperature Corrosion in Different Atmosphere, Effect of Doping, Alloying Elements, Coating Methods for High Temperature Corrosion Protection, Pilling Bedworth Ratio and its Applications. | 10 hours |
| | | |
| **Unit 3** | **Corrosion Protection**<br>Principles of Protection, Selection of Suitable Design, Inhibition, Coating Methods, Anodic protection and Cathodic protection<br>**Electro deposition**<br>Classification and mechanism of electrodeposition processes. Electroplating of copper, Nickel and Chromium. Principles of Alloy plating and electroless plating, Anodising, Galvanizing. | 10 hours |
| | | |
| **Unit 4** | **Factors affecting Corrosion**<br>Environment affecting corrosion, effects of soil, chemicals, moisture and atmospheric gases,temperature and velocity, metallurgical factors<br>**Corrosion Testing**<br>Physical and Electrochemical Methods such as ASTM standard methods A262 Practice A to E and their equivalents, Surface Preparation, Exposure Technique, Corrosion Rate Measurements<br>**Material Selection to Combat Corrosion**<br>Specific Corrosion Applications Such as Marine Industry, Petrochemical Industry, High Temperature Service, Chemical Industry, Automobile, High Temperature & High Pressure corrosion in Industries | 10 hours |

### 3. Electrometallurgy and Corrosion Lab (List of Experiments)

| Experiment No | Title |
|---|---|
| **1** | To prepare the samples for corrosion testing. |
| **2** | To determine corrosion rate of given sample by weight loss method in Sulfuric acid solution. |

| | |
|---|---|
| **3** | To determine corrosion rate of given sample by weight loss method in Sodium Chloride (NaCl) solution. |
| **4** | To determine corrosion rate of given sample by weight loss method in Hydrochloric acid solution. |
| **5** | Comparative study of corrosion rate by weightless method for different acid solutions. |
| **6** | To study and perform IGC corrosion of stainless steel. |
| **7** | Determination of Inter granular corrosion susceptibility by microstructure evaluation. |
| **8** | To study and observe galvanic corrosion of two metals. |
| **9** | Observation of Effect of anodic area and type of material on galvanic corrosion of metals. |
| **10** | To perform & observe pitting corrosion in stainless steel. |
| **11** | To study & perform the effect of current density on anodic dissolution. |
| **12** | To perform the electroplating of copper on a given base metal. |
| **13** | To perform the Anodizing of Aluminum in $H_2SO_4$ Solution. |
| **14** | To study and perform cathodic protection of a metal by sacrificial anode method. |
| **15** | To Study corrosion rate by Tafel Extrapolation method. |

## 4. Text Book(s)

## 7. Question Paper Pattern for End Sem Exam:

As per Appendix A

| Subject: **Powder Metallurgy** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | Subject Code: MT0603 | | | | Semester: **VI** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 4 | 0 | 2 | 5 | 60 | 60 | 40 | 40 | 200 |

**1. Course Outcomes:**

Student will be able to:

- Define and explain basic conditions of successful application of powder metallurgy technology for production of materials and components
- Formulate advantages and disadvantages of powder metallurgy
- Evaluate and propose optimum technology for preparation of powder materials
- Classify typical representatives of individual powder metallurgy technologies
- Evaluate and evaluate influence of individual technological parameters on basic powder metallurgy operations
- Optimize material and technological parameters of production

**2. Content:**

| | | **Allotted hours** |
|---|---|---|
| **Unit1** | Introduction: Historical and modern developments in P/M. Advantages limitations and applications of Powder Metallurgy. Characteristics of metal powder in terms of particle size , shape and size distribution, Characteristics of powder mass such as apparent density, tap density, flow rate, friction conditions. Properties of green compacts and sintered compacts. | 8 hours |
| | | |
| **Unit2** | Important methods of metal powder manufacturing like machining, milling, atomization, electrodeposition, reduction from oxide, carbonyl process, production of alloy powders, new development. Powder conditioning, fundamentals of powder compaction, density distribution in green compacts, types of compaction presses, compaction tooling and role of lubricants. Single and double die compaction, isostatic pressing, hot pressing, effect of variables on sintering, sintering atmospheres and sintering furnaces. | 10 hours |

| | | |
|---|---|---|
| **Unit3** | Powder rolling, powder forging, powder extrusion and explosive forming technique Definition of sintering, stages of sintering | 10 hours |
| | | |
| **Unit4** | Mechanism of sintering, liquid-phase sintering, infiltration process. Study of sintered bearings, cutting tools, and metallic filters. Study of friction and antifriction parts and electrical contact materials. | 10 hours |

**3. Powder Metallurgy Lab (List of Experiments)**

| Experiment No | Title of experiment |
|---|---|
| **1** | To study the sieve analyses of metal powders and determine the correction factor. |
| **2** | To study the particle size and shape of metal powders by Image analyzer. |
| **3** | To study the importance of blending and mixing operation for powder metallurgy. |
| **4** | To determine the apparent density and tap density of metal powders. |
| **5** | To determine the friction index and flow rate by hole flow meter. |
| **6** | To study and carry out heat treatment on metal powders. |
| **7** | Demonstrations of single action die compaction of metal powders by hydraulic press. |
| **8** | To study the sintering mechanism of metal pellets. |
| **9** | Characterization of sintered product. |
| **10** | To produce metal powder by Water Atomization Technique |
| **11** | Characterization of metal powder produced by water atomization technique |
| **12** | To produce metal powder by Gas Atomization Technique |
| **13** | Characterization of metal powder by Gas Atomization Technique |
| **14** | Copper powder production by electrolysis method. |
| **15** | Characterization of copper powder produced by electrolysis method. |

**4. Text Book(s):**

1) Introduction to Powder Metallurgy by A.K.Sinha, 2011.

2) Principles of powder metallurgy by W.D. Jones, 1960.

**5. Reference Books:**

1) Handbook of powder metallurgy by Henry Herman Hausner, 1973.
2) Powder Metallurgy Technology by G. S. Upadhyaya, 2002.

**7. Question Paper Pattern for End Sem Exam:**

As per Appendix A

| Subject**: Metal Forming** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | | Subject Code: MT0604 | | | Semester**: VI** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 3 | 2 | 0 | 4 | 60 | 0 | 40 | 0 | 100 |

**1. Course Outcomes:**

- Understand the principle of deformations and energy requirements.
- Understand different methods of deformations to produce various shapes.
- Get knowledge of special techniques of deformation.

**2. Contents**

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | **Fundamentals of metal working:** Yield criteria, Von-Mises equation, Classification of metal forming processes, Mechanics of metal working, Flow curve for materials, Temperature in Metal Working, Hot working, Cold working & Warm working, Strain rate effect of metallurgical structure and non-metallic inclusion on the manufacturing process, Workability, Residual stresses, Annealing of cold-worked metals. | 8 hours |
| | | |
| **Unit 2** | **Forging:** Classification of forgoing processes, Forging equipment and operations, Open die forging, Closed die forging, Plane strain forging analysis, Forging defects, Metallurgical variables associated with forging, Powder metallurgy forging, Residual stresses in forging. **Rolling:** Terminology of rolled products, Different kinds of rolling mills, Deformation zone in rolling, Neutral point, Angle of bite, Forward slip, Roll flattening, Rolling variables, Hot rolling, Cold rolling, Rolling of blooms billets, slabs, plates, strips, sheets, bars, rods & light section, Lay out of different mills for rolling of above products, Elementary roll pass design, Forces and geometrical relationships in rolling, Defects in rolled products. | 10 hours |
| | | |

| | | |
|---|---|---|
| **Unit 3** | **Extrusion:** Classification of extrusion processes, Direct and indirect extrusion, Impact extrusion, Hydrostatic extrusion, Extrusion equipment, Extrusion ratio, Process variables, Lubrication & defects in extrusion, Derivation of extrusion pressure, Extrusion of tubing, Production of seamless pipe and tubing.<br>**Drawing:** Rods, wires and tubes: Theory and practice of wire drawing, Wire drawing equipment, Variables in wire drawing, Defects in formed products. | 10 hours |
| | | |
| **Unit 4** | **Sheet metal working:** Shearing, Blanking, Bending, Stretch forming, Deep drawing, Spinning, Piercing, Swaging, Embossing, Coining, High energy rate forming, explosive forming, electromagnetic forming, electro hydraulic forming, formability diagrams, Super-plasticity. | 10 hours |

**3. Text Book(s)**

1) Mechanical Metallurgy by G. E. Dieter, SI Metric Editions, McGraw-Hill Book Company, 1988.

**4. Reference Books**

1) Manufacturing Technology (Foundry, Forming and Welding) by P. N. Rao, TMH, 2007.
2) Metal Forming: Mechanics and Metallurgy by William F. Hosford and Robert M. Caddell, PTR Prentice-Hall (USA), 2011
3) Handbook of Metal Forming by K. Lange (Editor-in-Chief), Springer Verlag (Germany), 1985.

As per Appendix A

| Subject: **Material Characterization (Elective – 1)** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | | Subject Code: MT0605 | | | Semester**: VI** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 3 | 2 | 0 | 4 | 60 | 0 | 40 | 0 | 100 |

## 1. Course Outcomes :

- Theory and practice of x-ray and electron diffraction.
- Basic elements of electron microscopy.
- Basic aspects of optical characterization methods including Raman and infrared spectroscopy

## 2. Contents

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | Importance of Material characterization, Classification of techniques for characterization. Image formation, resolving power, numerical aperture, empty magnification, depth of focus, components of microscopes, important lens defects and their correction, principles of phase contrast, interference and polarized light microscopy, Image analyzer. | 8 hours |
| | | |
| **Unit 2** | Thermal Analysis techniques: Basic Principles, Working and applications of DTA, TGA, TMA and DSC. | 10 hours |
| | | |
| **Unit 3** | Studies by electron microscopes: Principle, Construction and Working of TEM, SEM, STEM with their merits, demerit and applications, techniques of replica preparation. | 10 hours |
| | | |
| **Unit 4** | X-Ray diffraction and their applications: Working principles of diffractometer. Indexing of XRD patterns, determination of crystal structure, lattice parameter, and crystallite size by diffraction techniques. Numerical based on XRD. | 10 hours |

| | | |
|---|---|---|
| | Spectroscopic and Chemical analysis Techniques: IR & Raman spectroscopy, Energy Dispersive Spectroscopy (EDS) & Wavelength Dispersive Spectroscopy (WDS), XRF. | |

| 3 | 2 | 0 | 4 | 60 | 0 | 40 | 0 | 100 |

## 1. Course Outcomes

- This course will give students hands-on experience with popular computational materials science and engineering software through a series of projects in: electronic structure calculation, molecular simulation, phase diagram modeling, finite element modeling, and materials selection.
- The course will familiarize students with a broad survey of software tools in computational materials science, scientific computing, and prioritize the physical principles underlying the software to confer an understanding of their applicability and limitations.

## 2. Course Content

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | Introduction to Computational Materials Science, multiple scales in crystalline materials, materials scales for modeling, Introduction to simple numerical methods for solving coupled differential equations and for studying correlations, applications. | 8 hours |
| | | |
| **Unit 2** | Introduction to quantum mechanical modeling: Hartree-Fock and Density function theory (DFT), plane wave based DFT calculations, equilibrium properties and surfaces from DFT calculations, atomistic modeling of defects in materials, applications.<br>Introduction to Monte Carlo Methods: Kinetic, Lattice, applications. | 10 hours |
| | | |
| **Unit 3** | **Classical equilibrium statistical mechanics:**<br>Phase space, Hamiltonian's equation, macroscopic translation and rotation, phase space coordinates, canonical transformations, applications. | 10 hours |

| | | |
|---|---|---|
| | **Molecular Dynamics:**<br>Introduction, brief MD algorithm, microcanonical ensemble (NVE), velocity-verlet algorithm, canonical ensemble (NVT), applications. | |
| | | |
| **Unit 4** | **Multiscale methods:**<br>Introduction to multiscale models, sequential multiscale models, concurrent multiscale models, Hierarchial methods, partitioned-domain methods, spanning time scales, Statistical mechanics of systems in metastable equilibrium, applications.<br>Introduction to phase diagram modeling using CALPHAD and Thermo-Calc, applications. | 10 hours |

**3. Text Book(s)**

1) Modeling Materials: Continuum, Atomistic and Multiscale Techniques, Ellad B. Tadmor and Ronald E. Miller (2011) Cambridge University Press.

**4. Reference Books**

1) Guo X.Z. (Ed.), 2007, "Multiscale Materials Modelling: Fundamental and Applications", Woodhead Publishing Limited, Cambridge.

**6. Question Paper Pattern for End Sem Exam**

As per Appendix A

| Subject: **Industrial Ceramics & Polymers (Elective – 2)** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | | Subject Code: MT0606 | | | Semester**: VI** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 4 | 0 | 0 | 4 | 60 | 0 | 40 | 0 | 100 |

## 1. Course Outcomes:

- Students will be able to understand the various types of ceramic and different between advance and traditional ceramics.
- They can understand the developing methods of raw materials.
- They can get the understanding of sintering mechanism of ceramics and characteristics of sintered ceramics.
- They can get the knowledge of processing method of ceramics.
- They can understand the process that is used to produce glass–ceramics.
- They can get the idea about properties, applications of different clay products, refractory ceramics and abrasive ceramics.
- Comparison between traditional and advance ceramics
- Application of advance ceramics
- They can understand the polymer molecule in terms of its chain structure and, in addition, how the molecule may be generated from repeat units
- They can understand the number–average and weight–average molecular weights, and degree of polymerization

## 2. Contents

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | Introduction, definition and scope of ceramics. Historical perspective, classification, Structure of ceramics, Pauling's Rules, Ceramic Phase Diagrams, Silicate structures.<br>**Traditional ceramics**: An overview, history, raw materials, Shaping, sintering, abrasives, White wares, Glazing and decoration.<br>**Refractories:** Types of refractories, fireclay, mullite, silica refractories, magnesite refractories, carbide & nitride refractories, pure oxide refractories, chrome refractories | 8 hours |

| | | |
|---|---|---|
| | | |
| **Unit 2** | **Glass:** Nature of glass, structure, glass forming systems, silicate systems, non-silicate systems, Types of Glasses, manufacture of glass, Viscous Deformation of Glasses, Ceramic Glass, Advance ceramics and their application.<br>**Processing of Ceramics**: Processing of ceramic powders, shape forming operations- Dry pressing, isostatic pressing, Hot Pressing, HIP, slip casting, Extrusion method, injection molding, hot pressing and hot isostatic pressing, Sol –gel processing and monolithic ceramics. Thermal Treatment- Drying & Firing of ceramics: kiln design & sintering mechanism and densification,<br>**Properties:** (Thermal, Mechanical & Optical properties) of sintered ceramics. Ceramics used for energy and environment technologies (fuel cell, lithium battery, gas sensor and catalytic support), ceramic coating, ceramic in bio-medical application, nanotechnology and ceramics | 10 hours |
| | | |
| **Unit 3** | Historical Background, Basic concepts of polymeric materials, Classification and forms of Polymers, Tacticity, Functionality, Different types of polymerization, chemistry of Polymerization: Chain polymerization, Step polymerization, Polymerization Techniques: Bulk polymerization, Solution polymerization, Suspension polymerization, and Emulsion polymerization. | 10 hours |
| | | |
| **Unit 4** | Molecular weight & Size, Determination of molecular weight - methods for measuring number average, weight average, viscosity average MW, Molecular weight distribution, Degree of Polymerization, Polymer Degradation, Glass transition temperature, Crystallinity, Elastomers, Fiber and plastic, Additives, Processing of polymers- Extrusion, Injection Molding, Transfer Moulding, and Blow Molding. | 10 hours |

## 3. Text Book(s)

1) Chemistry of solids – by A. K. Galwey, Chapman & Hall Publication
2) Properties of Matter – by Thomas Pollack, McGraw Hill publication
3) Fundamentals of Ceramics – Barsoum
4) Introduction to Ceramics - W.D Kingery
5) J. S. Reed: - Introduction to the principles of ceramic processing
6) Chemistry of Glasses - A. Paul

## 4. Reference Books

1) The Science and Engineering of Materials- by Donald R. Askeland
2) Materials Science & Engineering- by William F Smith
3) Introduction to Ceramics by F.H.Norton.
4) Materials Science and Processes, S. K. Hajra Choudhary, Indian Book Distributing Co., Ilifo book distributors Co., Kolkata, 1985
5) Materials Science and Engineering by William F Smith.

## 6. Question Paper Pattern for End Sem Exam

As per Appendix A

| Subject**: Nano Technology (Elective – 2)** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | Subject Code: MT0607 | | | | Semester**: VI** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 4 | 0 | 0 | 4 | 60 | 0 | 40 | 0 | 100 |

**1. Course Outcomes:**

After a successful completion of the course, students should be able to:

- Describe and explain Nanotechnology.
- Describe Nanomaterials based on their dimensionality.
- Explain the importance of reduction in materials dimensionality, and its relationship with materials properties
- Explain top-down approaches for Nanomaterial fabrication, and give some examples
- Perform a literature survey on a chosen topic in the scientific literature
- Write a scientific report with appropriate references and citations.
- Present results of a research in the form of an oral presentation.

**2. Contents**

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | **Introduction** to Nanomaterials and nanotechnology, historical developments. An overview of scope & applications of nanotechnology, classifications and types of Nanomaterials. Basic understanding of various phenomena at nanoscale namely size confinement, interfacial surface phenomena. | 8 hours |
| | | |
| **Unit 2** | **Introduction to basic building blocks** namely atoms, molecules, self-assembly, carbon nanotubes, nanocrystals, fullerenes, quantum dots, and quantum wires. Functional properties of nanomaterials such as physical, mechanical, electrical, magnetic, chemical and optical properties. Size dependence of material at nano scale. Bulk vs. nano properties of materials. | 10 hours |
| | | |
| **Unit 3** | **Synthesis & fabrication techniques** 'Top down' vs. 'Bottom-up' approach of synthesis. | 10 hours |

| | | |
|---|---|---|
| | Review of synthesis methods namely sol-gel method, chemical vapour deposition, physical vapour deposition, sputtering, etc. Consolidation methods for nanopowders such as cold isostatic pressing (CIP), hot isostatic pressing (HIP), Dynamic compaction, Conventional and Microwave sintering. | |
| | | |
| **Unit 4** | **Characterization of nanomaterials** by using transmission electron microscopy (TEM, atomicforce microscopy (AFM). Applications of nanomaterials namely nanograined structuralmaterials & nanocomposites, nanomagnetic materials, chemical applications etc. | 10 hours |

**3. Text Book(s)**

1) Nano Materials by A.K.Bandopadhyay New Age International Publishers
2) Introduction to Nanoscience and Nanotechnology by K.K.Chattopadhyay and A.N.Banerjee, PHI Learning Pvt. Ltd.
3) Nanostructured Materials: Professing, Properties and Applications, ed. by C.C. Koch, William Andrew Publishing, New York, 2002.

**4. Reference Books**

1) Nanotechnology by George Timp, Springer-Verlag, New York, 1999.
2) Nanoparticles and Nanostructured Films: Preparation, characterization & Applications, ed. By J.H. Fendler, John Willey & Sons, 1998.
3) Handbook of Nanophase and Nanostructured Materials, ed. by Z.L. Wang, Z. Zhang and Y. Lim, Kluwer Academic Publisher, 2002.
4) Handbook of Nanostructured Materials and Nanotechnology, ed. by H.S. Nalwa, Vol. 1-5, Academic Press, 2002.
5) Carbon Nanotubes: Science and Applications ed. by M. Meyyappan, CRC Press, Boca Raton Florida, 2004.
6) Processing and Properties of Structural Nanomaterials, Leon L. Shaw, C. Suryanarayana & Rajiv S. Mishra, TMS, 2003.
7) Nanomaterials: Synthesis, Properties & Applications, ed. by A.S. Edelstein and R.C. Cammarata, published by Institute of Physics, UK, 1996.

**5. Question Paper Pattern for End Sem Exam**

As per Appendix A

| Subject: **Composite Materials (Elective – 2)** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | Subject Code: MT0608 | | | | Semester**: VI** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 4 | 0 | 0 | 4 | 60 | 0 | 40 | 0 | 100 |

## 1. Course Outcomes:

- Name the three main divisions of composite materials, and cite the distinguishing feature of each.
- Cite the difference in strengthening mechanism for large-particle and dispersion-strengthened particle-reinforced composites.
- Distinguish the three different types of fiber reinforced composites on the basis of fiber length and orientation; comment on the distinctive mechanical characteristics for each type.
- Calculate longitudinal modulus and longitudinal strength for an aligned and continuous fiber reinforced composite.
- Compute longitudinal strengths for discontinuous and aligned fibrous composite materials.
- Note the three common fiber reinforcements used in polymer-matrix composites, and, for each, cite both desirable characteristics and limitations.
- Cite the desirable features of metal-matrix composites.
- Note the primary reason for the creation of ceramic-matrix composites.
- Name and briefly describe the two subclassifications of structural composites.

## 2. Contents

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | Introduction, Review of current developments, Importance of Composites over other materials. Advantages and disadvantages of composite materials, Matrix and reinforcement phases, Classification of composite materials, Types of composite materials – dispersion strengthened composites, particulate composites, concretes, Fiber-reinforced Composites, Structural composite. | 8 hours |

| | | |
|---|---|---|
| **Unit 2** | Types of reinforcements – Whiskers and fibers, preparation, structure and properties of different reinforcing fibers, carbon fibers, glass fibers, polymer fibers and alumina fibers. Fiber-reinforced Composites: Influence of Fiber Length, Critical Fiber Length, Short and Continuous Fibers, Influence of Fiber Orientation and Concentration, Fiber reinforced composites with different matrix systems, polymer matrix (thermoset and thermoplastic) composites, metal matrix composites and ceramic matrix composites, carbon-carbon composite, intermetallic composites. | 10 hours |
| | | |
| **Unit 3** | Strengthening mechanisms, Aspect Ratio, Rule of Mixture, Role of interfaces in composites, Toughening mechanisms in PMCs, MMCs, and CMCs, Wettability and bonding. Properties of composites: Mechanical Properties of composite, Effect of fiber volume content, orientation of fibers & void contents on mechanical properties of composite, fracture behaviour of composites, Applications of composites in different field, Environmental effects in composites. | 10 hours |
| | | |
| **Unit 4** | Fabrication of composites, Fiber Forms, Prepregs, Moulding Compounds-Processes, Lay-Ups, Filament Winding, Pultrusion, vacuum bag moulding, Pressure bag moulding, vacuum impregnation and injection moulding, transfer moulding, Green composites; Synthesis and Properties of Nanocomposites, Hybrid composites. | 10 hours |

**3. Text Book(s)**

1) K.K. Chawla, Composite Materials – Science & Engg., Springer- Veslag, New York, (1988).
2) Mel M. Schwartz, Composite Materials: Properties, Non-destructive testing and Repair, Prentice Hall, New Jersey, (1996).
3) L.J. Broutman and R.M. Krock, Modern Composite Materials, Addison-Wesley, (1967).
4) David A Colling & Thomas Vasilos, Industrial Materials: Polymers, Ceramics and Composites, vol. 2, Prentice Hall, N. Jersey, (1995).

**4. Reference Books**

1) The Science and Engineering of Materials by D. R. Askeland, Fifth Edition, 2006
2) Hand Book of composites – G. Lubin, 1982.

3) An introduction to composites materials – D. Hull, 1996.

| 4 | 0 | 0 | 4 | 60 | 0 | 40 | 0 | 100 |

**1. Content:**

| | | **Allotted hours** |
|---|---|---|
| **Unit1** | Atomic Structure: Fundamental Properties. Atomic Nucleus. Radio activity, half life period and isotopes Fission, fusion and other nuclear reactions. Critical mass. Neutron cross section, Multiplication factor and nuclear disintegration. | 8 hours |
| | | |
| **Unit2** | Essential parts of Nuclear Reactor. Reactor types, Reactor Fuel Cycle. Indian atomic power plants, Nuclear power program me in India and future trends. Difference in separation methods as compared to conventional methods. | 10 hours |
| | | |
| **Unit3** | Purity requirement of nuclear metal. Separation process- Ion and Solvent extraction techniques. Occurrence, extraction mechanical and physical properties and uses of Uranium and Thorium. Occurrence, extraction mechanical and physical properties and uses of Zirconium, hafnium and plutonium. | 10 hours |
| | | |
| **Unit4** | Methods of enrichment and production of ultrahigh purity metals and their importance in nuclear metallurgy. Influence of neutron damage on mechanical properties. Effects of radiation damage on steel and Zircalloys, Scope of beryllium in nuclear plants. Extraction, occurrence, physical and mechanical properties of Be and its applications, Reactor pressure vessel embrittlement (indicating parameters, mechanisms, mitigation methods). | 10 hours |

**3. Text Book(s)**

1) Nuclear Reactor fuel elements – Metallurgy & Fabrications-Kaufmann, 1962.

**4. Reference Books**

1) Extraction of non ferrous metals- H.S.Ray, 2006.
2) Handbook of Nuclear Engineering: Vol. 1: Nuclear Engineering Fundamentals,edited by Dan Gabriel Cacuci, Springer, 2010.
3) Proceedings of Seminar on Nuclear metallurgy-Bombay chapter

**6. Question Paper Pattern for End Sem Exam:**

As per Appendix A

| Subject: **Modelling of Metallurgical Processes (Elective – 2)** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | | Subject Code: MT0610 | | | Semester**: VI** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 4 | 0 | 0 | 4 | 60 | 0 | 40 | 0 | 100 |

## 1. Course Outcomes

- Description of metallurgical and materials processes and some simulation applications.
- Fundamental principles, methods, and approaches of simulation and modeling.
- Developing the theoretical background of metallurgical processes' simulation and modeling.
- To understand the importance and necessity of simulation and modelling studies in metallurgical and materials processes.
- Improve his/her theoretical background on simulation and modelling of metallurgical and materials processes.
- Be aware of the resulting innovations by applying simulation and modelling software.
- Create a model of a given metallurgical process by considering the related control parameters.

## 2. Course Content

| | | **Allotted hours** |
|---|---|---|
| **Unit1** | Introduction to modelling & simulation, Basic principles of modelling & simulation, Mathematical and physical basis of modeling & its methodology, Basic approaches and techniques of modelling & simulation, Examples of metallurgical and materials processes. | 8 hours |
| | | |
| **Unit2** | Mass and energy balances, and simultaneous solutions, In-class demonstration of modelling software, Modeling and Simulation in Materials Science, Application of the methodology for materials behavior and processing problems, Modeling of structural materials, Description of certain metallurgical processes (roasting, smelting, leaching, precipitation, electrolysis, refining, etc.) and steps of their mathematical modelling and approaches. | 10 hours |

| | | |
|---|---|---|
| | | |
| **Unit3** | Concepts of batch, and continuous processes in metallurgy, Determining the effect of controlling parameters, such as composition, temperature, particle size, concentration, pressure, gas/liquid/solid flow rate, stirring speed, current density, etc., and mathematical modelling thereof. Assigning these parameters to the student groups as term projects. | 10 hours |
| | | |
| **Unit4** | Case studies on mathematical modelling from iron and steel making will be discussed such as modelling of blast furnace, basic oxygen furnace, electric arc furnace, ladle furnace, ingot casting, continuous casting, forging, electroslag refining, sheet metal forming etc. some case studies on physical modelling such as ladle furnace, tundish, continous casting etc. | 10 hours |

**3. Text Book(s)**

1) Engineering Process Metallurgy, R. I. L. Guthrie, Oxford University Press.
2) Barber Z.H., 2005, "Introduction of Materials Modeling", Maney Publishing.
3) King P.R., 2001, "Modeling and Simulation of Mineral Processing Systems", ISBN:0-7506-4884-8.West

## 1. Course Outcomes

- Understand the basics & importance of joining processes.
- Understand the various types of Joining operations used in the industries
- Co-relating the basic machine products with the of product applicability & use skills for specific joining processes.
- Developing the capability to analyze and select the various criteria of Quality joining of the metals
- Implement effectively and accurately the suitable joining process to improve the efficiency & life of the product / Machines
- Learn various quality dimensions of joints, cost factor, factor of safety etc.
- Understanding the advance processes of joining& its applicability;
- Joining any national institutes like IIT, NIT, IISc in specialized fields of metallurgical & materials engineering such as Welding technology.
- For a 'Metallurgist', there is lot of job opportunities with tremendous growth in almost all types of industrial sectors in the present scenario. These jobs include different functions such as, Material Scientist, Techno-commercial Manager, Quality control & assurance, Marketing & Sales, Project & Planning.
- Services such as ONGC, IOCL, SAIL, GAIL, ESSAR, ISPAT, laboratories of national and inter-national repute such as NASA,BARC, BARC,CSIR, NML, DRDO, DMRL, IPR, etc.

## 2. Contents

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | Introduction: History, Importance of metal joining processes, Classification of metal joining processes - Classification based on application of filler material & without filler material, source of energy, fusion and pressure welding processes, joint design and edge preparation, physics of arc, characteristic of arc. Welding | 8 hours |

| | | |
|---|---|---|
| | positions. Soldering and brazing: Difference between both the processes, consumables used, methods of brazing, fluxes used, and their purpose and flux residue treatment, comparison with welding process. | |
| | | |
| **Unit 2** | Metal transfer, forces acting on the arc, different modes of metal transfer, heat flow in metals, prediction of heating and cooling rates. Manual metal arc(MMA) or shielded metal arc (SMA) welding, Submerged arc welding (SAW), Gas metal arc welding (GMAW) or MIG/MAG welding, TIG welding, Plasma Arc welding: Principle, Equipment requirement, electrodes for welding of structural steels, electrode coating classification, process description, shielding gases, advantages and disadvantages, application of processes. | 10 hours |
| | | |
| **Unit 3** | Resistance welding: General principle of heat generation in resistance welding, application of resistance welding processes. Process details and working principle of spot, seam, and projection welding, electrode materials, shapes of electrodes, electrode cooling, selection of welding currents, voltages. | 10 hours |
| | | |
| **Unit 4** | Other welding processes like Electron beam welding, Laser beam welding, Friction welding, Friction Stir Welding explosive welding, ultrasonic welding, diffusion welding, Electroslag and Electro gas welding etc. Weldability and defects: introduction, Weldability test, Weldability of ferrous and non ferrous materials, joining metallurgy of the dissimilar metals, clad metals etc., Welding defects. | 10 hours |

**3. Metal Joining Processes Lab (List of Experiments)**

| Experiment No | Title of experiment |
|---|---|
| **1** | To study the edge preparation and preparation of different types of weld joints. |
| **2** | To study effect of proportion of oxygen and acetylene on the gas welding flame. |
| **3** | To study the effect of welding parameters on weld quality by SMAW welding. |
| **4** | Characterization of weldments prepared by SMAW |
| **5** | Preparation of joints using Tungsten Inert Gas welding. |

| | |
|---|---|
| **6** | Characterization of weldments prepared by TIG |
| **7** | Preparation of joints using Metal Inert Gas welding. |
| **8** | Characterization of weldments prepared by MIG |
| **9** | Preparation of different type of joints uses spot welding and butt welding. |
| **10** | Characterization of weldments prepared by spot and butt welding |
| **11** | To study the effect of rpm on weld microstructure by friction welding. |
| **12** | Characterization of weldments prepared by friction welding |
| **13** | To study the effect of gas flow rate on weld quality by MIG welding. |
| **14** | Application of welding Gauge. |
| **15** | Effect of GTAW parameters on weld bead morphology. |

**4.Text Book(s)**

1) The Metallurgy of Welding, Brazing and Soldering – J.F. Lancaster, George Alien and Unwin Ltd., London.
2) Introduction to Welding and Brazing – D.R. Milner & R.L. Apps. Pergamon Press, London.

**5. Reference Books**

1) Manufacturing Technology (Foundry, Forming and Welding)-P.N.Rao, Tata Mc- Graw Hill.
2) The Physics of Welding- L.F.Lancaster, Pergamon Press.
3) Principles of Welding- R.S. Parmar.
4) Welding Technology- O.P. Khanna, Khanna Pub.
5) ASM Handbook Vol – 6
6) AWS ( American Welding Society )

**6. Digital Learning Resources**

www.nptel.ac.in

**7. Question Paper Pattern for End Sem Exam:**

As per Appendix A

| | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 4 | 0 | 0 | 4 | 60 | 00 | 40 | 00 | 100 |

## 1. COURSE OUTCOMES :

- To understand the significance of testing of metallic and non metallic materials and components without destroying them.
- To study the application of these methods in assessing reliability of components & plants.
- To study the life time assessment of components.
- To understand the principle and application of visual testing methods
- To understand principle of liquid penetration testing technique.
- To understand the principle of magnetic particle testing and its applications

## 2. Content

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | Fundamentals and introduction to non-destructive testing. Scope and limitations of NDT<br>Visual examination methods. Different visual examination aids.<br>Leak and pressure testing of industrial components. Various methods of pressure and leak testing underlying principles of these testing systems. | 8 hours |
| | | |
| **Unit 2** | Dye penetrant Methods, Basic Principles, Capillary Action, Wetting and Non-Wetting<br>Characteristics, Different Types of Penetrants, Detailed Procedure and Recent Developments in DPT.<br>Magnetic Particle Testing methods, Basic Principles of MPT, magnetization methods demagnetization methods, MPT equipment & instruments, sensitivity calibration of MPT equipment.<br>Ultrasonic methods of NDT-Basic principles of wave propagation, types of waves, transducers and transducer materials, advantages and limitations of UT. | 10 hours |

| | | |
|---|---|---|
| **Unit 3** | Pulse Echo and Through Transmission techniques of UT, Calibration methods, use of standard blocks, Thickness determination by ultrasonic method. Study of A, B and C scan presentations.<br>Radiographic testing of metallic components. X-ray and Gamma-Ray radiography. Their principles, methods of generation. Industrial radiography techniques. Types of films, screens and penetrameters. Interpretation of radiographs. Film Processing. Radiography Contrast. | 10 hours |
| | | |
| **Unit 4** | Eddy current testing: Basic principles and applications such as detection of defects and characterization, sorting of materials, determination of film/coating thickness, measurement of electrical conductivity and magnetic permeability of materials. Eddy current testing equipments and its block diagram, different types of test coils and their applications.<br>Acoustic Emission Technique. Conductivity & resistivity methods and their applications. Thermal methods of NDT.<br>Selection Criteria for various NDT techniques. | 10 hours |

**3. Text Book(s)**

1) Practical Non-destructive Testing– Baldev Raj,T. Jayakumar &M. Thavasimuthu, Norosa Publishing House, New Delhi.
2) Non-destructive testing, Warren J. McGonnagle, Gordon Breach, Science

**4. Reference Books**

1) Ultrasonic Testing of Materials, J. Krautkramer
2) Treaties on Non-destructive testing, by Dr. E. G. Krishnadas Nair, Non-destructive testing, R. Hatmshaw.
3) Ultrasonic Methods of Testing Materials, Leszek Filipezynski, Zdzislaw Pawlowski

**5. Digital Learning Resources**

www.nptel.ac.in

**6. Question Paper Pattern for End Sem Exam :**

As per Appendix A

| Subject: **Alloy Design** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | Subject Code: MT0703 | | | | Semester**: VII** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 3 | 2 | 0 | 4 | 60 | 00 | 40 | 00 | 100 |

1. **Course Outcomes** :
   - To provide knowledge about the basic concept of alloys and its properties
   - To impart the importance of overall design in metallurgy.
   - To help them understand all newer types of alloys and its applications
   - To make them understand strengthening mechanisms used in alloying.
   - To study alloy design for particular mechanical properties & its overall importance
   - How newer materials can be developed and which can be useful in new technologies and development
   - Application of computer based alloy designing

**2**. **Contents**

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | **Concept & Effect on properties**<br>Concept of alloy design, Steps in alloy design, Significance of alloy design Single phase, dual phase and multiphase materials, Effect of matrix on properties of materials, Effect of size, shape and distribution of second phase on mechanical properties of alloys. | 8 hours |
| | | |
| **Unit 2** | **Strengthening Mechanisms**<br>Precipitation and particle coarsening, recrystallization and grain growth. Solid/Liquid phase transformation in pure metals, single phase alloys, constitutional super cooling and eutectic alloys. | 10 hours |
| | | |
| **Unit 3** | **Alloy Design for better mechanical properties**<br>Alloy design for better tensile strength, ductility, toughness, fatigue strength, creep strength, wear resistance and elevated temperature. | 10 hours |
| | | |

| | | |
|---|---|---|
| **Unit 4** | **Types of Alloy Steels & its applications**<br>Types of Stainless Steels – Its Introduction, properties and applications High strength low alloy steels, Maraging steels, High speed steels, Hadfield steel and Super alloys. Alloy design of lightweight and high Strength powder metallurgical Al based alloys Application of computer-based methods for alloy designing. | 10 hours |

**3. Text Book(s)**

1) Boyer, H.E. (ed.), Selection of Materials for component Design: Source Book, American Society for Metals, Metals Park, Ohio.
2) Ashby, M.F. Materials Selection in Mechanical Design, New York: Pergamon, 1992.
3) Ranganathan S., Arunachalam V.S. and Cahn R.W. (Eds.), Alloy Design, Indian Academy of Science, Bangalore, 1981.
4) Tien John K. and Ansell George S. (Eds.), Alloy and Microstructural Design, Academic Press

**4. Reference Books**

1) ASM Handbook, Vol.1 & 2, Properties and Selection: Metals Park, Ohio.
2) Structure & Properties of Alloys – Robert M. Brick, Robet B. Gordon & Arthur Phillips, Eurasia Publishing House (private)Ltd., New Delhi
3) Metals Hand Book Ninth Edition – Vol 1.

**5. Digital Learning Resources**

**www.nptel.ac.in**

**6. Question Paper Pattern for End Sem Exam**:

As per Appendix A

| Subject: **Material Testing and Standards** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | Subject Code: MT0704 | | | | Semester**: VII** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 3 | 0 | 2 | 4 | 60 | 60 | 40 | 40 | 200 |

## 1. Course Outcomes

- Understand different types of Mechanical testing (i.e. destructive testing and non destructive testing).
- Understand different types of standards related to different mechanical testing.
- Understand standard procedure for mechanical testing.

## 2. Contents

| | | **Allotted hours** |
|---|---|---|
| **Unit1** | Introduction: Importance of Material Testing. Classification of various types of testing methods. Selection of testing methods. Importance of calibration of testing instruments. Calibration methods and standards for various tests.<br>Non-destructive testing – Importance, scope, advantages and limitations – Dye penetrant, radiographic magnetic, ultrasonic and eddy current testing and their application. | 8 hours |
| | | |
| **Unit2** | Tensile test: Engineering stress –strain curve, true stress –strain curve, Instability in tension, Stress distribution at neck, principle of stress and strain measurement, bend test measurement of ductility and formability, compression test, yield stress and proof stress, universal tensile testing machine and tensometer.<br>Numericals of Tensile test, Fatigue and Ductile Brittle Transition Temperature<br>Hardness test: Introduction, Brinell, Vickers and Rockwell hardness tests, Meyer hardness test, Analysis of indentation by an indenter, Relationship between hardness and the flow curve, Micro-hardness tests, Hardness conversion, Hardness at elevated temperature. | 10 hours |
| | | |

| | | |
|---|---|---|
| **Unit3** | Impact testing: Types of impact tests and their relative merits and demerits. Ductile-brittle transitions behavior and its significance.<br>Torsion test: Introduction, Mechanical properties in torsion, Torsional stresses for large plastic strains, Types of torsion failures, Torsion test vs. tension test, Hot torsion test. | 10 hours |
| | | |
| **Unit4** | Fatigue and Creep Testing – Elementary treatment of fatigue phenomenon, S – N curve and corrosion fatigue, fatigue testing principle, Signification of Creep testing procedure , creep curve and its interpretation, stress-rupture test. Metallurgical and mechanical factors affecting, creep and fatigue failures.<br>Introduction to various standards for mechanical testing: ASTM E8/E8M - Standard Test Methods for Tension Testing of Metallic Materials, ASTM E21 - Standard Test Methods for Elevated Temperature Tension Tests of Metallic Materials, ASTM E18: Standard Test Methods for Rockwell Hardness of Metallic Materials, ASTM E384: Standard Test Methods for Standard Test Method for Strain-Controlled Fatigue Testing of Metallic Materials, ASTM 139: Standard Test Methods for Conducting Creep, Creep-Rupture, and Stress-Rupture Tests of Metallic Materials, ASTM E606: Standard Test Method for Strain-Controlled Fatigue Testing, ASTM E466: Standard Practice for Conducting Force Controlled Constant Amplitude Axial Fatigue Tests of Metallic Materials, ASTM E9: Standard Test Methods of Compression Testing of Metallic Materials at Room Temperature, ASTM E209, SA 370- Hardness Testing, SA370-Impact Testing, ASTM E6- D- Ductility and Bend Testing, ASTM E6- E- Creep and Stress Relaxation Testing, ASTM E6- G- Measurement and Calibration, ASTM E 190, ASTM E 527, ASTM E 92, ASTM E 139. | 10 hours |

## 3. Testing of Materials Lab (List of Experiments)

| Experiment No | Title of Experiment |
|---|---|
| **1** | To study the Brinell hardness testing machine & perform the Brinell hardness test. |
| **2** | To study the Rockwell hardness testing machine & perform the Rockwell hardness test. |
| **3** | To study the Vickers hardness testing machine & perform the Vickers hardness test. |

| | |
|---|---|
| **4** | To determine the impact toughness of a given specimen by Izod test and Charpy test. |
| **5** | To determine the tensile strength of specimen. |
| **6** | To study room temperature creep strength of specimen. |
| **7** | To study room temperature fatigue strength of specimen. |
| **8** | To perform compression & bending tests on UTM. |
| **9** | Visual Inspection of fractured surfaces. |
| **10** | To perform Dye Penetration Test for given sample. |
| **11** | Study of Magnetic particle tester. |
| **12** | Tostudy Ultrasonic Flaw Detector |
| **13** | To study Eddy Current Tester. |
| **14** | Detailed study of Radiographic Testing Method. |
| **15** | To study In situ Metallographic using replica technique |

## 4. Text Book(s

1) G. E. Dieter, Mechanical Metallurgy, McGraw Hill Book Company, 1987.
2) Testing of metallic materials by A.V.K Suryanarayana, PHI
3) ASTM standards

## 5. Reference Books

1) Physical Metallurgy Principles by R.E. Reed-Hill, East West Press.
2) Deformation and Fracture Mechanics of Engineering Materials -R. W. Hertzberb
3) Mechanical Behaviour of Materials -T. H. Courtney
4) ASM Handbook, NDT and Quality control.
5) Testing and Inspection of Engineering Materials- Davies, Taroxall and Wiscosil
6) Mechanical Testing of Metallic Materials – D A Beument.
7) Engineering Materials Science – C W Richards
8) Non Destructive testing – Bac Gonnagle.

## 6. Digital Learning Resources

www.nptl.ac.in

## 7. Question Paper Pattern for End Sem Exam

As per Appendix A

| Subject: **Selection of Materials and Failure Analysis** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | | Subject Code: MT0705 | | | Semester**: VII** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 3 | 2 | 0 | 4 | 60 | 00 | 40 | 00 | 100 |

## 1. Course Outcomes:

- Objective 1 (Technical Knowledge) - To impart Broad knowledge of Metallurgical aspects of engineering materials selection & technology practices to support design, application, installation, manufacturing, operation and maintenance for successful careers in Academics/ Research & industry that meet the needs of Society and multinational companies
- Objective 2 (Technical Skills) – To develop basic scientific principles and engineering fundamentals necessary to formulate, analyze and solve engineering &technical problems & demonstrate the ability to synthesize data and technical concepts for application to product design & developments.
- Objective 3 (Professional Skills) - To Work effectively & efficiently as an individual and as a member of a multidisciplinary projects & social Activities.
- Objective 4 (Social Awareness & Life-long Learning) - To be awareness of social concerns and professional responsibilities & ethics in the workplace. & also to demonstrate professional training and ability to adapt to changes in the workplace through formal and informal education

## 2. Contents

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | Philosophy of material selection, motivation for selection, relationship to available resources, concept of resource base, Criteria for selection of engineering materials – service requirements, ease of manufacturing, availability of materials and cost effectiveness. Selection for mechanical properties like strength, toughness, stiffness, fatigue, creep and temperature resistance. | 8 hours |
| | | |

| | | |
|---|---|---|
| **Unit 2** | Selection for surface durability like corrosion resistance, wear resistance. Relationship between material selection and material processing.<br>Identification of required properties. Selection of materials based on available property data and optimization to select the best material.<br>Case studies in material selection like materials for bearings, gears, automobile structures, aircraft components, ship structures, etc. | 10 hours |
| | | |
| **Unit 3** | Importance of failure analysis and its relationship to material selection, fundamental causes of failure, general practice in failure analysis.<br>Failure- types and characteristics: Identification and characterization of ductile and brittle type of failures. Fracture mechanism, fracture modes and micro fractographic features | 10 hours |
| | | |
| **Unit 4** | Concept and Mechanism of Failure: Identification and characterization of fatigue failures, types of fatigue, corrosion fatigue and contact fatigue, etc. Corrosion and corrosion related failures such as hydrogen embrittlement, stress corrosion cracking and high temperature failures.<br>In-process failures: Case studies, Service failures: Case studies | 10 hours |

## 3. Text Book(s)

1) Selection and Uses of Engineering Materials – F.A.A. Cranes & J.A. Charles, Butterworth & Com. Ltd., London.
2) Engineering Materials – Vol. 1 & 2 – Michael F. Ashby & David R.H. Jones, Pergamon Press, New York.
3) Engineering Materials-Selection and Value Analysis –H.J. Sharp, Elsevier Publishing Company Inc., New York.
4) Analysis of Metallurgical Failures- V.J. Colangelo & F.A. Heiser, John Wiley & Sons, New York.
5) Failure Analysis of Engineering Materials – Charlie R. Brooks and Ashok Chaudhary, McGraw Hill, New York.
6) Metallurgy of Failure Analysis – A.K. Das, McGraw Hill, New York.

## 4. Reference Books

1) Metals Handbook – Eighth edition – Failure Analysis and Prevention, American Society of Metals, Metals Park, Ohio.
2) Metals Handbook – Eighth edition – Fractography, American Society of Metals, Metals Park, Ohio.

3) Handbook of materials selection - Myer Kutz, John Wiley & Sons, New York.
4) Handbook of materials selection for engineering applications- G.T. Murray, M. Dekker

**5. Digital Learning Resources**

**www.nptel.ac.in**

**6. Question Paper Pattern for End Sem Exam**

As per Appendix A

| Subject: **Advanced Ferrous Metallurgy (Elective – 3)** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | | Subject Code: MT0706 | | | Semester**: VII** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 4 | 0 | 0 | 4 | 60 | 00 | 40 | 00 | 100 |

## 1. Course Outcomes :

The students will be able to know the basic concept of advancement in ferrous metallurgy, able to know thermodynamics and reaction between oxides and make them clear with reaction part, understand modern developments that have taken place in blast furnaces and other production of iron &steel, different methods of sponge iron production and also secondary steel making processes, recent trends in steel making & iron making.

The 'Metallurgist' will be able to acquire M Tech /ME / MSc(engg) & PhD degrees in order to enhance , sustain and nurture his/her professional career by :
Joining any national institutes like IIT, NIT, IISc in various specialized fields of metallurgical & materials engineering such as Industrial metallurgy, Steel technology.
For a 'Metallurgist', there are a lot of job opportunities with tremendous growth in almost all types of industrial sectors in the present scenario. These jobs include different functions such as Managerial role, Material Scientist, Techno-commercial Manager, Quality control &assurance, Marketing &Sales, Project &Planning.
Services such as ONGC, IOCL, SAIL, GAIL, ESSAR, ISPAT,laboratories of national and inter-national repute such as NASA,BARC, BARC, CSIR, NML, DRDO, DMRL, IPR, etc.
There is plenty of scope and feasibility for a 'Metallurgist' to go for self employment by setting up an 'Enterprise/ Industrial Unit in Setup a small foundry of ferrous and non-ferrous metals.

## 2. Contents

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | **Thermodynamics of oxides and their reduction:** Thermodynamics and kinetics of iron oxide reduction. Kinetics of solid- solid and solid-gas reactions. | 8 hours |
| | | |

| | | |
|---|---|---|
| **Unit 2** | **General Problems related to Indian Steel plants:** Problems of Indian Steel Plants. High temperature properties of iron bearing materials. | 10 hours |
| | | |
| **Unit 3** | **Pre-treatment Techniques:**<br>Pre-treatment of hot metal. Physico-chemical aspects of pre-treatment processes. Status of hot metal treatment in India.<br>Electric Arc Furnace (EAF) steel making. Design of EAF-AC, DC electric arc. Latest trends in EAF design and operation.<br>Secondary steel making processes. Alloy steel making in EAF using secondary refining. Continuous casting. | 10 hours |
| | | |
| **Unit 4** | Roll of synthetic slags. Electro-slag refining. Slag-metal reaction in iron and steel making. Ferro-alloy production. Application of plasma technology. | 10 hours |

**3. Text Book(s)**

1) Principles of secondary Processing and Casting of Liquid Steel-Ahindra Ghosh, Oxford & IBH, New Delhi.
2) Electrometallurgy of Steel and Ferro-alloys, Vol. I & II – F.P.Edneral, Mir Pub., Moscow.
3) International Symposium on *Blast Furnace Iron Making*, Jamshedpur, Nov. 1985, Organised by the Indian Institute of Metals and Tata Iron & Steel Company Ltd.
4) Workshop on *Production of Liquid Iron using coal*, Eds. H.S.Ray et al, Allied Publishers Ltd., New Delhi, 1994.

**4. Reference Books**

1) Principles of secondary Processing and Casting of Liquid Steel-Ahindra Ghosh, Oxford & IBH, New Delhi.

**5. Digital Learning Resources**

www.nptel.ac.in

**6. Question Paper Pattern for End Sem Exam**:

As per Appendix A

| Subject: **Advanced Materials and Applications (Elective – 3)** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | | Subject Code: MT0707 | | | Semester**: VII** | |

| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 4 | 0 | 0 | 4 | 60 | 00 | 40 | 00 | 100 |

**1. Course Outcomes**

- The successful students will gain knowledge on special steels, alloy cast iron, light metals and some super alloys.
- After completion of this subject students will able to solve industrial problems and can replace tradition material by some of the advanced materials for better results.

**2. Contents**

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | Special steels Ferritic, Austenitic, Martensitic, Duplex and Precipitation hardenable stainless steels, Dual phase steels, TRIP steels, Maraging steels, High speed steels, Hadfield steels, Free cutting steels, Ausformed steels, Tool Steels, manganese steels, chrome steels, electrical steels, bearing steels, spring steels, heat resistant steels, creep steels, HSLA steels<br>Alloy cast iron High silicon cast iron, Ni-hard, Heat resistant cast iron | 8 hours |
| | | |
| **Unit 2** | Light metals and their alloys Aluminum, magnesium and titanium alloys, Metallurgical aspects, Mechanical Properties and applications Super alloys Iron base, nickel base and cobalt base super alloys, Composition, Properties and their application<br>Rapid Solidification Techniques, Production of metallic glasses, Atomic arrangement, Comparison with crystalline alloys, properties & applications | 10 hours |
| | | |
| **Unit 3** | Nanomaterials & technology Definition, Types of nanomaterials including carbon nanotubes and nanocomposites, Methods for creating nano structures, Processes for producing ultrafine powders - | 10 hours |

| | | |
|---|---|---|
| | physical synthesis and chemical synthesis, Physical and mechanical properties and their applications<br>Smart materials Shape memory alloys, piezoelectric materials, Electro-rheological fluid, Magneto- rheological fluid | |
| | | |
| **Unit 4** | Biomaterials Property requirement, Concept of biocompatibility, Cell-material interaction and body response to foreign materials, important biometallic alloys, Ni-Ti alloy, Co-Cr-Mo alloys<br>Miscellaneous Advanced Materials Magnetic materials, Engineering polymers, ceramics and composites, aerospace materials, cryogenic materials, semi conducting and superconducting materials | 10 hours |

**3. Text Book(s)**

1) The Science and Engineering of Materials by D. R. Askeland and P. P. Phule, Thomson Publication, 2005.

**4. Reference Books**

1) Advances in Material Science by R. K. Dogra and A. K. Sharma, 2003.
2) Elements of Materials science by Van Black, 6$^{th}$ Edition, 2008
3) Engineering Materials and Applications by R. A. Flinn and P. K. Trojan, 1999.
4) Light Alloys: Metallurgy of Light Metals by I. J. Polmear, 1982.
5) Nano Technology by Gregory Tirp, Springer Verlag, 2005

**6. Question Paper Pattern for End Sem Exam:**

As per Appendix A

| Subject: **Advanced Foundry Technology (Elective – 3)** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | | Subject Code: MT0708 | | | Semester**: VII** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 4 | 0 | 0 | 4 | 60 | 00 | 40 | 00 | 100 |

## 1. Course Outcomes:

The students are expected to have adequate knowledge and understanding on the following four areas of foundry technology as the outcome of this course:

- Newer materials which are in the state of development so also the newer processes that are more competitive, case of solidification software and ISO 9000 as measures of producing quality castings.
- Mechanization of foundry plants for faster rate of production and specifications for major equipment.
- Layout of foundry plants, maintenance of machinery, equipment and material handling system.
- Quality control measures at various sections in foundry including analysis of defects and salvage of defective castings.

## 2. Contents

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | New materials, processes & software applications: new core & mould binders & additives, new lining & refractory materials, magnetic moulding process, full mould process, vacuum moulding process, ISO-9000 computer applications in metal casting, use of solidification software & simulation, energy conservation in foundry industries. | 8 hours |
| | | |
| **Unit 2** | Foundry mechanization: mechanical equipment in a foundry, sand preparation & control, sand handling & conveying system, moulding machines:- sand slingers, pneumatic rammers, simultaneous jolt & squeeze, high pressure moulding, typical specifications for major equipment in foundry | 10 hours |

| | | |
|---|---|---|
| **Unit 3** | Plant site location: plant layout of small scale & medium scale & large scale foundry, plant engineering /maintenance /services: plant machinery & equipment, environmental pollution & its control in foundry, consideration on layout & material handling system, modernization & mechanization of a foundry. | 10 hours |
| | | |
| **Unit 4** | Casting defects analysis & salvaging of defective castings by using techniques such as welding, brazing, braze welding & soldering, burning on, patches & plugs, impregnations of castings, quality control in pattern & mould making, melting & heat treatment, fettling & cleaning, use of statistical methods in quality control of casting. | 10 hours |

**3. Text Book(s)**

1) Metal Casting: Principles and Practice by T. V. Raman Rao, New-Age International (P) Ltd. Publishers, New Delhi, 1998.
2) A textbook of Foundry Technology by M. Lal Dhanpat Rai & Sons, 1998.
3) Steel Foundry Practices by P. Bindulya.

**4. Reference Books**

1) Principles of Solidification and Materials Processing (Vol. 1 & Vol. 2) by R. Trivedi, J. A. Sekhar & J. Mozumdar.
2) International Conference on Management and Pollution in Foundries, 1990.
3) IIF Transactions, 1998.

**6. Question Paper Pattern for End Sem Exam**

As per Appendix A

| Subject: **Phase Transformations (Elective – 3)** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | Subject Code: MT0709 | | | | Semester: **VII** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 4 | 0 | 0 | 4 | 60 | 00 | 40 | 00 | 100 |

**1. Course Outcomes**

- This course will provide the student with an understanding of the basic principles and mechanisms underlying both solid-solid and liquid-solid phase transformations with an emphasis on metallic materials.
- The objective is to apply the concepts of thermodynamics, diffusion and kinetics, and crystallography (crystal structure and symmetry in materials) to develop a clear understanding of the free energy changes and kinetics associated with various types of phase transformations.
- An ability to apply and couple the basic concepts of thermodynamics, diffusion, and crystallography.

**2. Contents**

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | **Review of Thermodynamics:** Equilibrium, Single Component Systems, Binary Solutions, Equilibrium in Heterogeneous Systems, Binary Phase Diagrams, Kinetics of Phase Transformations<br>**Review of Diffusion:** Atomics Mechanisms of Diffusion, Interstitial diffusion, Self Diffusion, Vacancy Diffusion, Diffusion in Substitutional Alloys | 8 hours |
| | | |
| **Unit 2** | **Solidification:** Nucleation in pure metals, Growth of a pure Solid, Alloy Solidification, Solidification during Quenching from Melt | 10 hours |
| | | |
| **Unit 3** | **Diffusional Transformations in Solids:**<br>Nucleation in solids - Homogeneous and Heterogeneous, Overall Transformation Kinetics – TTT Diagrams, Precipitation in Age Hardening Alloys, Cellular Precipitation, Eutectoid Decomposition, Massive Transformations, Ordering Transformations | 10 hours |

| | | |
|---|---|---|
| **Unit 4** | **Diffusionless Transformations:**<br>Characteristics of Martensitic Transformations, Martensite Crystallography, Martensite Nucleation, Martensite Growth, Tempering of Ferrous Martensite, Strain induced transformation | 10 hours |

**3. Text Book(s)**

1) Phase Transformations in Metals and Alloys, Third Edition, David A. Porter, Kenneth E. Easterling, Mohamed Sherif; CRC Press.

**4. Reference Books**

1) Transformations in Metals, P.G. Shewmon, McGraw-Hill, 1969.
2) Principles of Phase Transformations and Heat Treatment, A. K. Mallik, I. I. T. Bombay.

**5. Digital Learning Resources**

NPTEL Lectures on Phase Transformation (www.nptel.ac.in)

**6. Question Paper Pattern for End Sem Exam:**

As per Appendix A

| Subject: **Advances in Thin Film Technology (Elective - 3)** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | | Subject Code: MT0710 | | | Semester**: VII** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 4 | 0 | 0 | 4 | 60 | 00 | 40 | 00 | 100 |

## 1. Course Outcomes

- Discuss the differences and similarities between different vacuum based deposition techniques,
- Evaluate and use models for nucleating and growth of thin films,
- Asses the relation between deposition technique, film structure, and film properties,
- Discuss typical thin film applications,
- Motivate selection of deposition techniques for various applications.

## 2. Contents

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | Role of Thin films Technology and Devices; Vacuum evaporation- Hertz- Knudsen equation, evaporation from a source and film thickness uniformity. | 8 hours |
| | | |
| **Unit 2** | Basics of vacuum science, creation of vacuum: rotary, diffusion, getter ion, turbo molecular, and cryo pumps, measurement of vacuum: Penning, Pirani, ionization gauges, B-A gauge. Designing a typical vacuum system, vacuum leak detection: helium leak detector, residual gas analyzer. | 10 hours |
| | | |
| **Unit 3** | Thin film properties like Mechanical properties: adhesion and stress measurements, electrical properties, resistivity variation, Hall Effect, Optical properties: reflection, refraction, ellipsometry, reflecting and antireflecting films. | 10 hours |
| | | |

| | | |
|---|---|---|
| **Unit 4** | Thin film analysis ion beam sputtering, selective surfaces, depth profiling, Study of inter Diffusion in thin films using XPS, AES, SIMS and RBS. Study on special coatings like Graphene and Photovoltaic | 10 hours |

**3. Text Book(s)**

1) M. Ohring, The materials science of thin films, Academic press
2) D. L. Smith, Thin-film deposition, principles and practice, McGraw-Hill
3) K. L. Chopra, Thin Film Phenomena, Robert E. Krieger publishing

**4. Reference Books**

1) D. M. Mattox, Handbook of physical vapor deposition (PVD) processing, Oxford, c2010. ($2^{nd}$ed.)
2) P. M. Martin (Eds), Handbook of deposition technologies for films and coatings, Oxford, 2009. ($3^{rd}$ed.)
3) D Clocker, S I Shah (Eds), Handbook of Thin Film Process Technology, Institute of Physics Publishing, London 1995.
4) W N G Hitchon, Plasma Processes for semiconductor Fabrication, Cambridge University Press, Cambridge 1999.
5) Elshabini-Riad, A. R. Aicha, Thin film technology handbook / New York: McGraw-Hill, c1998. (TK7872.T55 E47 1998 )
6) H. Lüth, Solid surfaces, interfa ces and thin films, Heidelberg, New York, Springer-Verlag, c2010. ($5^{th}$ed.)

**5. Digital Learning Resources**

http://nptel.ac.in/

**6. Question Paper Pattern for End Sem Exam**

As per Appendix A

| Subject: **Industrial Welding Codes and Standards (Elective – 3)** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | | Subject Code: MT0711 | | | Semester: **VII** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 4 | 0 | 0 | 4 | 60 | 00 | 40 | 00 | 100 |

## 1. Course Outcomes

- Description of welding codes and materials specifications.
- Fundamental principles, methods, and approaches of welding processes.
- Developing the theoretical background of welding processes' applicability and effectiveness.
- To understand the importance and necessity of selection of appropriate consumable, welding processes, welding parameters and testing procedures.
- Improve his/her theoretical background on applicability of a welding process, parameters and weld testing.
- Be aware of the use of various welding codes and standards widely used in industries.

## 2. Contents

| | | **Allotted hours** |
|---|---|---|
| **Unit 1** | Fabrication In Piping Industry: Process and product standards for manufacturing of pipe – welding procedure and welder qualification, field welding and inspection. Structural Welding Codes: Design requirements, allowable stress values, workmanship and inspection. | 8 hours |
| | | |
| **Unit 2** | Fabrication of Pressure Vessel: Design requirements, fabrication methods, joint categories, welding and inspection, post weld heat treatment and hydrotesting, (ASME Sec VIII-1 & 2). | 10 hours |
| | | |
| **Unit 3** | Welding procedure: Welding procedure specification, procedure qualification records. Welder Qualification: Performance qualification, variables. | 10 hours |
| | | |

| | | |
|---|---|---|
| **Unit 4** | Materials: Introduction to materials standard and testing of materials, consumables testing and qualification as per ASME / AWS requirements. Consumables: Types of consumables, Consumable testing and qualification as per ASME / AWS requirements. | 10 hours |

**3. Text Book(s)**

1) Welding Engineering and Technology by R. S. Parmar, Khanna Publishers.

**4. Reference Books**

1) ASME Section VIII – Division 1,2
2) ASME Section IX
3) ASME Section II Part A and C
4) API 5L
5) API 1104.
6) AWS D1.1 Structural Welding Code

**5. Digital Learning Resources**

http://nptel.ac.in/

**6. Question Paper Pattern for End Sem Exam**

As per Appendix A

| Subject: **Disaster Management** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Program: **B. Tech Metallurgical Engineering** | | | | Subject Code: CV0712 | | | Semester: **VII** | |
| | | | | | | | | |
| **Teaching Scheme** | | | | **Examination Evaluation Scheme** | | | | |
| **Lecture** | **Tutorial** | **Practical** | **Credits** | **University Theory Examination** | **University Practical Examination** | **Continuous Internal Evaluation (CIE)- Theory** | **Continuous Internal Evaluation (CIE)- Practical** | **Total** |
| 1 | 0 | 0 | 0 | 24/60 | 0 | 16/40 | 0 | 100 |

**Course Objectives:**

1. To explain students the conceptual applications and principles of management to mitigate various disasters.

**Course Outcome:**

1. Understand disasters, disaster preparedness and mitigation measures.
2. Understand role of IT, remote sensing, GIS in risk reduction.
3. Understand disaster management acts and guidelines along with the role of various stack-holders during disasters.

**COURSE CONTENTS:**

**UNIT-I** **[03]**

**Introduction**

Concepts and definitions: disaster, hazard, vulnerability, risk, capacity, impact, prevention, mitigation)

**UNIT-II** **[04]**

**Disasters classification**

Natural disasters (floods, drought, cyclones, volcanoes, earthquakes, tsunami, landslides, coastal erosion, soil erosion, forest fires etc.); manmade disasters (industrial pollution, artificial flooding in urban areas, nuclear radiation, chemical spills etc); hazard and vulnerability profile of India, mountain and coastal areas, ecological fragility

**UNIT-III** **[06]**

**Disaster Impacts**

Disaster Impacts (environmental, physical, social, ecological, economic, political, etc.); health, psycho-social issues; demographic aspects (gender, age, special needs); hazard locations; global and national disaster trends; climate-change and urban disasters. Disaster Risk Reduction **Disaster management cycle**

Phases; prevention, mitigation, preparedness, relief and recovery; structural and non-structural measures; risk analysis, vulnerability and capacity assessment; early warning systems, Post-disaster environmental response (water, sanitation, food safety, waste management, disease control); Roles and responsibilities of government, community, local institutions, NGOs and other stakeholders; Policies and legislation for disaster risk reduction, DRR programmes in India and the activities of National Disaster Management Authority.

**UNIT-IV** **[02]**

**Applications of Science and Technology for Disaster Management and Mitigation**

Geo-informatics in Disaster Management (RS, GIS and GPS), Disaster Communication System (Early Warning and Its Dissemination), Land use planning and development regulations, Disaster safe designs and Development Regulations, Disaster safe designs and Construction structural and Non structural Mitigation of Disasters. Science and Technology Institutions for Disaster Management in India.

**Evaluation Scheme:**

A four member committee designated as project evaluation committee member duly nominated by the HOD from amongst the faculty member will evaluate the project of each student under the following headings

1) CIE Internal Evaluation (40 Marks):

   CIE component will consist of Report (40 Marks): This includes the Seminar Report writing. The report should include Abstract, Introduction, Literature Survey, Review of Experimental/Computational Work, Discussion and Conclusion.

2) End Sem Evaluation (60 Marks):

   Oral Presentation (40 Marks): A presentation is the process of presenting a topic to an audience of students and minimum two professors.

   Viva (20 Marks): This includes how the student handles Question and Answer session after presentation.
